FAQ

Q: How is SunSmile® Herbal Toothpaste different from other brands?

A: The main ingredients in most regular toothpastes are potentially harmful and can irritate gums, mouth tissue, and sensitive teeth. Health Canada has mandated that all fluoride toothpastes sold in Canada carry a cautionary poison warning on the label. This is especially alarming because many types of toothpaste are artificially flavored to appeal to children, with some even tasting like candy. And even if the toothpaste isn't swallowed, potentially harmful ingredients can be absorbed through mucosal lining.

SunSmile® Herbal Toothpaste is a better, healthier choice because it doesn't contain artificial or harmful ingredients. It's formulated with baking soda and a combination of fruit enzymes and herbal extracts to deliver powerful yet gentle, safe cleaning action. Containing no artificial colors or sweeteners, its minty green flavor and color come from concentrated herbal extracts.
