FAQS

Q: Deionized water is listed as the first ingredient. What is its importance in the formulation?

A: Water is crucial in formulating the base of a shampoo, acting as a suspension agent for our botanical extracts and other ingredients. It combines with the soap ingredient to form a lather. Without water, shampoo’s consistency would be too thick. While hard or impure water can hinder the performance of shampoos, deionized water enhances performance by increasing lathering, ease of spreading, and clean rinsing.

Q: What is a complementary hair care product?

A: Kandesn[®] Styling Mousse is a great product to use after using Kandesn[®] Shampoo and Kandesn[®] Conditioner. Simply apply it to damp hair to give your hair more shine, body, and long-lasting hold. It benefits fine and thinning hair due to the unique nutritive and fortifying combination of herbal extracts and amino acids.
