FAQs

Q: Deionized water is listed as the first ingredient. What is its importance in the formulation?

A: Water is crucial in formulating the base of a shampoo, acting as a suspension agent for our botanical extracts and other ingredients. It combines with the soap ingredient to form a lather. Without water, shampoo's consistency would be too thick. While hard or impure water can hinder the performance of shampoos, deionized water enhances performance by increasing lathering, ease of spreading, and clean rinsing.

Q: What are some complementary Sunrider® products?

A: After shampooing, follow up with Kandesn® Conditioner. Its superior formula tames flyaways and frizz and allows you comb through your hair effortlessly. It's formulated with wheat protein, keratin, and specially developed amino acids to help rebuild and protect hair from breakage. The gentle, scalp-nourishing formula deeply conditions without weighing hair down.

Kandesn® Styling Glaze is another complementary product. It can be applied to wet or dry hair, and its moisturizing benefits work wonders on dry, course, or damaged hair. To complete your cleansing and moisturizing hair-and body-care routine, we recommend Kandesn® Spa Hand & Body Lotion.

HOW TO USE

Wet hair thoroughly, apply desired amount of shampoo, massaging lightly and rinse. Repeat if necessary.

NOURISH + CLEANSE = BALANCE
