BENEFITS

- Refreshes and soothes the skin
- Helps tighten appearance of pores
- Prepares skin for the application of moisturizers and foundation
- Contains no alcohol or harsh ingredients
- Helps balance and maintain skin's natural protective acid mantle
- Formulated with safe, natural ingredients
- Gentle, alcohol-free formula, ideal for sensitive skin

Product Fact Sheet Oi-Lin[®] Facial Toner

SOOTHE, TONE, AND REFRESH

Designed to tone and invigorate the skin, Oi-Lin[®] Facial Toner combines the benefits of both of our popular Kandesn[®] toners, Balancing Splash and Astringent. This sophisticated toner not only restores the skin's natural pH balance after cleansing but also prepares the skin to be moisturized. A special blend of herbal extracts ensures that even sensitive skin will be toned and soothed. Formulated to be extra mild, this toner does not contain any alcohol, which often produces drying effects.

PHILOSOPHY OF REGENERATION[®]

Dr. Tei-Fu Chen has applied his Philosophy of Regeneration[®] to skin care and has achieved beautiful results. The finest plant-based ingredients are expertly formulated to promote the health and vitality of your skin. We never use harmful ingredients such as mineral oil, petroleum by-products, or animal-derived proteins and oils, which can actually suffocate the skin and cause premature aging.

INGREDIENT HIGHLIGHTS

CUCUMBER EXTRACT

Providing natural emollient properties, cucumber is used in skin care to soften and hydrate the skin. Research also indicates that the lutein component of cucumber may help suppress melanogenesis, the process that leads to skin discolorations.

SODIUM PCA

This naturally occurring humectant (moisturizer) has high water-absorbing properties and even has the ability to absorb moisture from the air. It holds several times its weight in water.

THYME EXTRACT

This delicate herb contains powerful antioxidants that can help protect skin from free radical damage that leads to premature aging.

SUGAR CANE EXTRACT

Sugar contains glycolic acid, an alpha-hydroxy acid crucial for maintaining healthy skin. The natural glycolic acid in sugar not only helps condition and moisturize skin, but also helps protect it from toxins.

FAQS

Q: Why is pH-balance so important?

A: Your skin is your body's protective covering and an important defense against bacteria and environmental pollutants. It's fortified by the acid mantle, which is a combination of perspiration secreted from the sudoriferous gland and oil secreted from the sebaceous gland. The acid mantle is only slightly acidic (with a pH between 5.5 and 6.5) and acts as a protective barrier that also regulates the skin's oil and water balance.

Many companies use high-alkaline products of pH 8 and up, which strip the skin of this protective barrier. This leaves the skin prone to disorders, including dry skin, infections, and blemishes. In contrast, all our skin care products are pH balanced to work harmoniously with the acid mantle. This helps keep your skin young, firm, and vibrant—for only when the skin is permitted to function at its best can it look truly beautiful.

RECOMMENDATION

Saturate cotton pads and gently pat entire face with upward strokes.
