## INGREDIENT HIGHLIGHTS

### SQUALANE (VEGETABLE ORIGIN)

Our vegetable-derived squalane works wonders on all skin types, helping to hydrate and protect the skin, fight wrinkle formation, and prevent premature aging of the skin.

### AVOCADO OIL

One of the most penetrative of all plant oils, avocado oil provides long-lasting moisturizing effects. Its potent humectant properties also promote skin softness and plumping hydration.

### TOCOPHERYL ACETATE

This very stable form of vitamin E has powerful antioxidant properties and skin-conditioning benefits. It helps provide an extra layer of moisturizing protection for dry skin.

## FAQs

**Q: What are mineral sun blockers?**

**A:** Instead of using chemical sunscreen agents, which can be less effective and potentially irritating, Sunrider uses zinc oxide and titanium dioxide, minerals derived from the earth. When applied topically in a sunscreen formula, they block the sun's UVA and UVB radiation from being absorbed into your skin, which means they are considered broad-spectrum sunscreens. Zinc oxide and titanium dioxide are the only mineral compounds approved by Health Canada for use as active sunscreen ingredients.

## HOW TO USE

**Adults, adolescents and infants (ages 6 months old and above):**  
Apply liberally 15 minutes before sun exposure.

Reapply:

- After 40 minutes of swimming or sweating
- Immediately after towel drying
- At least every 2 hours
