## INGREDIENT HIGHLIGHTS

### DECYL POLYGLUCOSE

Derived from corn, this versatile, sulfate-free “green” surfactant is gentle on produce and non-irritating yet tough enough for serious surface cleaning.

## FAQs

**Q: Do I need to wash organic produce?**

**A:** Yes. Even if you buy organic fruits and vegetables, the handling, packaging, shipping, and in-store displays may introduce a variety of contaminants. Likewise, even pre-washed produce might still have dirt, residue, bacteria, and chemicals on it.

**Q: What is the cleansing agent in SunSmile® Fruit & Vegetable Rinse?**

**A:** Our formula is powered by a biodegradable surfactant derived from corn starch (decyl polyglucose), which is edible and doesn't contain harmful residues.
