

NEW PRODUCT FROM NEMCO PACKAGING

Go green, with our new coffee bag

Nemco offers a wide selection of the highest quality coffee bags. Our coffee bags are produced in Europe, and we can meet all your requirements for size, design, material and quality.

We have a wide selection of standard bags that can be delivered in small editions. If you have specific requirements for custom sizes and designs, we can create custom-made bags to meet your exact needs.

Go green, with our new coffee bag

OUTER LAYER

Virgin brown paper or black kraft paper, 50 microns thick with lightweight paper.

MIDDLE LAYER

High-barrier PET, 12 microns thick.

INNER LAYER

PE 70 microns thick (85% of the PE layer is made of green PE).

DECREASE THE ENVIRONMENTAL IMPACT

Quality features in all layers

- The PE layer is a blend of bio-based and oil-based plastic.
- High-barrier PET has an excellent oxygen and water vapor transmission barrier.
- The total material is made of at least 65% bio-based materials.
- The bag is free of aluminum and METPET.

Bio-based PE is made from sugarcane, a renewable resource, and has a negative carbon footprint since the production of sugarcane absorbs carbon dioxide from the atmosphere through photosynthesis. Additionally, the manufacturing process of bio-based PE requires less energy and produces fewer greenhouse gas emissions compared to traditional fossil-fuel-based plastics.
