

THE NEW **PACKAGING SYSTEM**

BY SEALPAC®

# ThermoSkin®

## Perfect positioning, perfect presentation: SEALPAC ThermoSkin®

With its innovative ThermoSkin® packaging solution SEALPAC once again highlights your products, like processed meat, fresh meat, poultry, seafood, game and ready meals, to the maximum. This high-output fully automated vacuum skin packaging system not only convinces due to its attractive look, but also offers a variety of favourable properties.

## Benefits:

- Striking presentation at point of sale
- Maximized shelf space utilization
- Extended shelf life due to deep vacuum
- Reduced drip-loss of meat products
- Available on non-dedicated thermoformers

**SEALPAC®**

*Forming Innovations*

INCREASED ATTENTION: **FITS LIKE A SECOND SKIN**

# ThermoSkin®

Optional product protrusion

Extended shelf life

Puncture resistant

## And this is how it works

The thermoformed and product-loaded bottom film is hermetically sealed to the special skin film by means of a deep evacuation process. The film fits the contours of the product **without folds or creases**.

Subsequently, a second top film can be sealed to create an **additional head space for extras**, even under MAP.

Various **easy opening methods** will provide increased user friendliness.

## Advantages at a glance:

- Fully automated thermoforming technology
- Attractive second-skin presentation
- Hermetic seal
- Secure product positioning, allowing for vertical presentation
- Accurate positioning of marinades and sauces, resulting in improved flavour
- Optional second top film creates head space for extras

## Extremely flexible

Instead of using a dedicated machine, the sophisticated ThermoSkin® packs are produced on a standard SEALPAC thermoformer with a specific ThermoSkin® tooling.

The machine can easily be converted for other packaging solutions, such as MAP, vacuum packs or ShrinkStyle.

## Beyond the scope

Products with a maximum protrusion of 40 mm above the sealing edge are securely packed by adding specific technical features to the machine configuration.

## SEALPAC – your package to success.

As a high-precision manufacturer, we support our customers in reaching their targets. We work together to create cost-effective and guaranteed high-quality solutions. Our flexible and dedicated approach will guide you in exploring individual alternatives to help shape your future.
