

Freight and Logistics industry news

Track and Trace standards

Issue 19, October 2022

The digitalisation of the freight sector has never been more important. Ensuring the freight transport process is as efficient and transparent as it can be is essential to serve the dynamic needs of the customer in these challenging times and to prepare for future growth.

For many years now, we have been working with industry and Government to provide the digital building blocks that are so critical to the industry transformation journey. Data standards are at the heart of optimising the opportunities offered by new technologies.

Share your location data for smoother delivery and pick-up processes

The National Location Registry has been in the media recently, winning an iAward, Woolworths supporting the registration drive and an article in Retail World

NLR wins Vic iAwards

The National Location Registry has won the Not-for-Profit & Community Solution Category of the 2022 iAWARDS Victorian chapter!

Get registered and be part of this significant piece of digital infrastructure for Australian supply chains. Integrity in location master data is so important to increased freight efficiencies, supply chain visibility and traceability efforts.

EPCISv2.0 - A revolution for supply chains

EPCIS v2.0 is a GS1 standard that achieves granular transparency of products throughout their lifecycle, from manufacture and distribution to destination. The updated EPCIS v2.0 helps answer supply chain challenges such as 'I want to know where my products are at any given time' and 'I want to know in advance exactly what's in a shipment?'
