GS1 Australia reports that it has organized the RFID Coalition Tech Expo as an opportunity for attendees to hear from industry experts presenting their radio frequency identification (RFID) success stories, and to network with like-minded individuals and meet dedicated RFID vendors able to help them with their specific needs.

The event will take place on Aug. 2, 2023, from 9 AM to 1:30 PM, and it is returning to Sydney, Australia, following a four-year hiatus resulting from the COVID-19 pandemic. Physical attendance will take place at Pullman Sydney Airport, but those unable to attend in person will be able to select virtual tickets and connect via Zoom.

Anthony Chesler, Thread Together's CEO, and Peter Reinke, Ramp RFID Solutions' CEO, will offer a session titled "Innovating Charity: How RFID Technology Is Transforming Thread Together."

Then, Andrew Sill, Sill Marketing's managing director, will be the speaker for a session called "RFID in the Real World."

Finally, a panel discussion will feature Myer's Alex van Diggelen, Puma's John Leorke and Thomas Warburton's Arnaud Gay, along with two solution providers chosen at random from a business card draw.

"The RFID Coalition Tech Expo is an opportunity to hear from industry experts presenting their RFID success stories, network with like-minded people and meet dedicated RFID vendors to help you with your

specific needs," said an GS1 Australia representative in a prepared statement.
