

Freight and Logistics industry news

Track and Trace standards

Issue 18, July 2022

The digitalisation of the freight sector has never been more important. Ensuring the freight transport process is as efficient and transparent as it can be is essential to serve the dynamic needs of the customer in these challenging times and to prepare for future growth.

For many years now, we have been working with industry and Government to provide the digital building blocks that are so critical to the industry transformation journey. Data standards are at the heart of optimising the opportunities offered by new technologies.
