

Savings Calculator

Improve your bottom line

A fast and efficient online tool to analyse your business data and uncover hidden savings.

What is the Savings Calculator?

The GS1 Australia Savings Calculator is an online business analytics tool that helps organisations uncover hidden savings within their supply chain.

Automate supply chain processes

Automation of Order to Cash EDI and Master Data Exchange (NPC) processes can provide your organisation with a competitive advantage.

- Reduce in operational costs
- Eliminate of process errors
- Increase delivery times
- Reduction in out of stocks
- Significantly reduce distribution costs
- Improve customer satisfaction

Manual, paper based processing of business transactions between trading partners can be very costly and time consuming. Adopting standards based approach to paperless trading across processes will create business value for your company, your business partners and your customers.

Automation of supply chain processes provide tangible results like;

- More fluid stock movements
- Greater flexibility and accuracy in stock management
- Improved traceability and
- Better product availability

The Savings Calculator has been developed in conjunction with leading universities including La Trobe, Deakin and Cranfield UK, leveraging the work completed by GS1 UK and GS1 France to ensure the Savings Calculator delivers accurate results.
