

Freight and Logistics industry news

Track and Trace standards

Issue 15, January 2022

As COVID-19 continues to impact businesses and supply chains, the opportunity to focus on the digitalisation of the freight sector has never been more important. Ensuring the freight transport process is as efficient as it can be to serve the dynamic needs of the customer in these challenging times and to prepare for future growth.

For many years now, we have been working with industry and Government to provide the digital building blocks that are so critical to the industry transformation journey. Data standards are at the heart of optimising the

opportunities offered by new technologies.

The Australian: Logistics special report

Read how the National Location Registry is delivering a lift to productivity in the logistics sector.

Scan4Transport

VT Freight Express implements GS1 Scan4Transport standards on transport labels

VT Freight Express is part of the global working group with representatives from logistic service providers, shippers, solution providers and industry from 21 countries that developed the new GS1 standards and implementation guideline.

As part of VT Freight Express's adoption of the Scan4Transport standards an initial 230 shippers recently went live with the new Scan4Transport transport labels.

Launched now: The Supply Chain Benchmarking Dashboard

Developed by the CSIRO, this new dashboard models Australian supply chains and provides a set of benchmarks to assist with performance evaluation and international comparison.

The interactive dashboard provides insights on:

- Freight task costs and value
- Travel distances and durations
- Supply chain movements between businesses
