

Advanced Full Arch Implants: Zygomas, Pterygoids, Vomer and More (Cadaver Course) with Dr. Clark Damon

16^{CE}

Lecture and Cadaver Lab

In this course explore how to treat more patients with same day, graftless fixed dental implant solutions by using advanced dental implant placement in the Zygoma, Pterygoid, and Vomer regions. Dr. Damon uses advanced full arch implants every week in their clinical practice. This two-day course involves didactic, hands-on models, and hands-on cadaver training.

Learning Objectives:

- Identify the rationale for advanced implant therapies
- Review in depth anatomy of each region
- Discuss diagnosis, case selection, and treatment planning

October 13-14, 2023

Time: 8 a.m. to 5 p.m.

Speaker: Dr. Clark Damon

Subject Code: 690

SAC: Advanced

Type: Lecture/Participation

Audience: Dentists, GPs, OMS, Periodontist, Prosthodontists, Surgeons

Location: SLR Medical Consulting
331 Cole Street
Dallas, TX 75207

Speaker

Dr. Clark Damon , a native Texan, attended University of Texas Dental School followed by a 1-year General Practice Residency at the Michael E DeBakey Veterans Affairs Hospital in Houston. He has 3 offices throughout Texas dedicated to Full Arch Implant restorations and performs 25 Arches a month. Cases are performed under IV Sedation or General Anesthesia. Dr. Damon provides Standard All on Four Implant placement as well as advanced techniques with Trans Sinus and Zygomatic implants to restore cases with more limited bone volumes. For his Full Arch restorations, Dr. Damon has several CAD/CAM technicians and removable technicians at his Fort Worth, TX Dental Lab - Bite Rite. We utilize 3 - 5 axis dental mills to mill all our products in house. Since 2015 we have milled full thickness zirconia restorations and today experiment with modern CAD/CAM materials and techniques such as PEKKTON, nano-ceramic materials on a titanium bar, and Acetyl (POM) materials. Dr. Damon is currently a Key Opinion Leader for Neodent, lectures Neodent. Dr. Damon has been course director and CEO of Texas Implant Institute since our first program in January 2019. Since our beginning we have educated over 200 clinicians in the hands-on cadaver program and hundreds through informative evening lectures.
