

IN ASSOCIATION WITH 1 ON 1 IMPLANTOLOGY

The Ultimate Full Arch Immediate Load Course Surgical & Prosthetic

LIVE
PATIENTS

This will cover all phases of the procedure from treatment planning to surgery and prosthetics of the full arch immediate load concept for patients with terminal dentition and edentulous patients. Preparing you to incorporate the full arch implant restoration into your daily practice to service the needs of many patients who need it and probably already exist in your practice's patient pool. Each participant will have the opportunity to execute an arch on a patient and fabricate a fixed provisional. In addition to executing and arch participants will be assisting other doctors with an arch.

OBJECTIVES

- Understanding the fundamentals of the full arch implant rehabilitation using the tilted implant concept.
- Anatomical and CBCT interpretation connected with the placement of Implants.
- Patient selection and Treatment Planning – Pre-Operation Patient's Condition Assessment and Post-Op care.
- The surgical procedure and prosthetic rehabilitation aspects.
- Understand complications and their management.
- Perform Hands-on surgery and prosthetics.
