Hands-on Experience with Digital Workflows

The InstaRisa Digital Workflow Course is a unique program designed to empower and enlighten every participant and inspire confidence in the utilization of three-dimensional Facial Scanning to aid in diagnosis and treatment planning with predictable outcomes. Starting with facially generated treatment planning, the InstaRisa team builds a philosophy and systems that incorporate many of the aspects of dentistry you already know. We then develop – through research, evidence, and proven clinical techniques – the Digital Workflows that allow for a Diagnostically Driven Treatment Planning concept using a facially generated and three-dimensional approach. Learning the appropriate Digital Workflows will allow you to perform many of your favorite procedures more efficiently and without all of the inherent difficulties of traditional analogue techniques. Although incredibly beneficial for full-arch or full-mouth dentistry, the InstaRisa Digital Workflows are applicable for all of your diagnostic appointments, treatment planning, routine restorative care, esthetic dentistry, and fixed and removable therapy, with or without dental implants.

Learning Objectives:

- Learn to comprehensively evaluate patients through simplified, systematic documentation using 3 Dimensional data.
- Learn to acquire digital records with hands-on demonstration and personalized instruction.
- Learn how to utilize 3 Dimensional data and incorporate it for comprehensive examination and facial generated treatment planning.
- Learn a unique, hassle-free method for providing full-arch restorations from start to finish.
- Show “proof-of-concept” by performing the workflows on models, hands-on, and delivering an appliance custom fabricated to fit precisely on the implants you just placed. In addition, we’ll perform live implant surgery on a live patient with delivery of a full-arch using our complete digital workflow.
- Learn digital workflows for dentures and over-dentures.
- Stand out from the competition by offering the latest industry innovation.
- Learn how to perform full-arch dentistry without the need for photogrammetry and expensive uni-functional equipment.

Time: 7 a.m. - 5 p.m.

Speakers: Dr. Art Mirelez, Dr. Amin Ramsey, Dr. John Brokloff, Dr. Jeff Bynum, Dr. Fernando Palanco

Speakers

Dr. Art Mirelez, Jr. maintains one of the most successful private dental practices in Fresno. Mirelez attended the prestigious Misch International Implant Institute Program and after completion, acquired his Fellowship with the International Congress of Oral Implantologist, one of the highest international designations for skill in the surgery and restoration of dental implants. Dr. Mirelez earned his Fellowship in the Academy of General Dentistry (FAGD) at the Academy of General Dentistry (AGD) in 2011 after completing over 500 hours of dental education after dental school. Today, Dr. Mirelez has over 2,000 hours of continuing dental education completed, and all his patients rest assured that only excellent and scientifically proven dentistry is provided.

Dr. Amin Ramsey is considered by his peers to be a global authority and a key opinion leader in implant dentistry. In fact, he treats many dentists and doctors as patients. He has a humanistic approach to helping people regain their beauty, dignity, function, and health. Other doctors and patients see Dr. Amin after being told "implants are not possible." He is a 12-time recipient of "Burbank's Best Dentist" award, and in his career has placed over 10,000 dental implants and treated some of the most complex implant cases in North America.

Dr. John Brokloff is a Board Certified Oral Surgeon practicing in Akron, Ohio. He has been in private practice since 1999. Dr. Brokloff has worked at many different practices including: Cleveland Clinic, Akron Children's, and the Veterans Administration. The scope of the practice includes: wisdom teeth removal, Implant surgery, general tooth extraction, TMJ stem cell injections.

Dr. Jeff Bynum, DDS is a Mentor and Clinical Instructor at the prestigious Kois Center in Seattle, Washington. Dr. Bynum has committed his practice and career to helping his patients and educating his peers. He has taught at several premier teaching facilities including the Ickert Teaching Center in Vancouver, BC as a clinical instructor and surgical tutor.

Fernando Palanco, DDT is a Chief Technical Officer. He started as Digital Dental Technologist in 2013. He moved from San Francisco Bay Area to Fresno CA.
