

Full Arches with Immediate Loading

Curitiba - PR, Brazil

27.5
CE

Hands-on Lecture

This course is for experienced clinicians and will present multiple full arch cases with immediate loading. This course covers principles of immediate loading, pre-requisites for primary stability, pre-prosthetic prep, multi-functional guides, surgical planning, impression techniques, working with the lab, one step hybrid fitting technique, and so much more! From the theory to practice, the participants will work with models, watch a live surgery demonstration, and perform one surgery case as main surgeon and another one as the assisting surgeon.

Learning Objectives:

- Define the principles of immediate loading
- Review pre-requisites for primary stability
- Discuss the importance of pre-prosthetic prep for the success of hybrid rehabilitations
- Demonstrate use of multi-functional guides
- Assess surgical planning for upper and lower jaw
- Apply surgical and impression techniques
- Practice working with the lab technician, cast and CAD/CAM metal bars
- Review one step hybrid fitting technique
- Discuss installation of the hybrid: recommendations and follow-ups
- Analyze full arch live surgery demonstration with immediate loading for definite hybrid rehabilitation
- Apply hands-on: surgical and prosthetic steps conducted on model
- Perform one full-arch treatment per participant as main surgeon and another one as second surgeon.
