

# Full Arch Digital Workflow (Double Arch)

The course offers a combination of in-depth didactic lectures, hands-on workshops, open discussions, and live patient demonstrations. Doctors, lab technicians, and team members will experience first-hand how to implement full arch procedures with digital technology into their practice. The topics and techniques covered throughout the course includes treatment planning, case selection criteria, 3D imaging interpretation, brain-guided surgical protocols, surgical tips, prosthetic treatment, implant placement, and full-arch/teeth-in-a-day conversion protocols. Additionally, we teach software tools for 3D printing, photogrammetry, facial scanning and digital design using exocad. We will also cover practice management topics of checklists, forms, sedation alternatives, consultations tips and modeling your practice and your office culture for full arch. Hands-on workshops will include placement of dental implants, Intraoral scanning, photogrammetry, and facial scanning for design. We teach the skills necessary to master double arch treatment without guides but with full digital workflow. These skills are essential to a full arch surgeon, GP and prosthodontist and anyone wishing to advance their skills and grow their practice past just a few arches per month.

## OBJECTIVES

- Learn case selection, radiographic interpretation, anatomy, complications, case presentation, sedation alternatives, digital photography, and digital treatment planning of the double arch.
- Understand the scientific rationale and justification for the morse taper implants, guided surgery, full arch procedure.
- Learn 3D printing
- Comprehend the Evolution and step-by-step process of digital full arch surgery and prosthetics as compared to traditional methods.
- Know business management tools in checklists, forms, consultations tips and modeling your practice and your office culture for full arch
- Be trained to merge data and design cosmetic and functional arches.
- Implement proper full arch protocols with FP1, FP2, and FP3 designs.
- Detail the steps of digital workflow on the day of surgery through delivery of a long-term provisional prosthesis.
- Observe live patient treatment of records appointments, surgery, and delivery of prosthesis.
- Practice placement of dental implants and use of IOS, photogrammetry, photography, and facial scanning.

## DATE & TIME:

Friday, September 29, 2023  
Saturday, September 30, 2023  
7:00am–7:30am Registration  
7:30am–5:30pm Program

## LOCATION:

Atlantic Implant Institute  
4429 Shore Dr  
Virginia Beach, VA 23455

## TUITION:

\$10,500.00 USD collected by  
Atlantic Implant Institute

## AUDIENCE:

General practitioners, Oral surgeon

## AGD CODE:

610

## SAC:

Straightforward

## TYPE:

Lecture

## CE HOURS:

17.5 hours

## SPEAKER:

Dr. Adam Hogan  
Dr. Alex Molinari  
Dr. Keith Klaus

**DR. ADAM HOGAN** is an accomplished implant dentist, lifelong learner, teacher, father, and resident of Virginia Beach. He has spent countless hours in post graduate education on dental implants, cosmetic dentistry, and reconstructive dentistry. Since 2006 he has operated an implant based general dental practice known as Implant Dentistry of Virginia. In 2018, Dr. Hogan changed his practice name to Full Implant Choice. He converted his office from a general practice to one specializing in dental implant surgery and complex reconstruction. Dr. Hogan created an in-office, dental laboratory for streamlined full arch treatment. In 2021, Dr. Hogan launched the Atlantic Implant Institute to advance the education and learning opportunities for dentists and laboratory technicians.

**DR. ALEX MOLINARI** is currently the Director Clinical Prof Relations and Education for Neodent USA, Inc. Dr. Molinari received a PhD in Periodontics from the Pontifical Catholic University of Paraná (PUC-PR\_BRAZIL), and a master's degree of implantology by the São Leopoldo Mandic University(Campinas, BRAZIL). Dr. Molinari is a specialist in periodontics at the University of Santa Catarina (UFSC – Florianopolis - BRAZIL) and holds a graduate degree in implant prosthesis from the University of Sagrado Coração (USC – Bauru - BRAZIL). He formerly taught at ILAPEO in Curitiba, BRAZIL and was a Neodent consultant for 15 years. His research has been published in some international journals and also books about Dental implant.

**DR. KEITH KLAUS** is a General Dentist currently in private practice in Flowood, MS. He graduated from the University of Mississippi Medical Center School of Dentistry in 2014. Prior to dental school, Dr. Klaus was a Research and Development Engineer for the US Army Corps on Engineers where he helped develop Autonomous Navigation Systems for unmanned vehicles. Dr. Klaus leverages his degree in Biological Engineering to design and execute single to full arch implant surgery and restoration, utilizing the latest CAD/CAM software and technology.

#### **Registration Policy**

- Registrations are taken on a first come, first serve basis
- Registrations are not considered final until payment is received
- Your registration will be confirmed by email within two weeks of receipt
- Partial payment cannot be accepted

#### **Cancellation and Refund Policy**

- Cancellation made 30 days or more before the course starts: Full refund
- Cancellation made 15-29 days before the course starts: 50% of the course fee will be refunded
- Cancellation made 0-14 days before the course starts: No refund
- A \$25 administration fee will apply to all cancellations

Straumann reserves the right to cancel courses that do not meet minimum enrollment. The course fee will be refunded, in full, within two weeks of the cancelled course date. Attendance is not confirmed until attendee has received a letter of confirmation from the Straumann Education Department.
