

GAS METERS

Machine Category:

Gas Meter

Industry: Controls Systems Sensors

Country: USA

Product Series:

Wiegand Sensor (Pulsing) / Wiegand Pulsing System

Specification:

Pulsing components and system compatible with HID

Series 2000 components

Competing Technical Solution:

- In house Wiegand sensor production

Benefits of Technical Solution

Several designs use 2 Wiegand sensors and a spinning magnet to create a 2ppr incremental encoder to measure gas flow in rotary meters.

Yield of self made Wiegand sensors became too low over time, thus a better solution from UBITO was requested. UBITO performed some tests and recommended use of the COTS WFS design. In addition UBITO consulted on the re-design of the existing system and provides manufacturing and testing services to customer for one system so far.

Reasons for Choosing POSITAL

- deep Wiegand and application knowledge
- high quality Wiegand sensors
- able to consult on, design and manufacture
 Wiegand Systems
