

SEED PLANTER

Machine Category: Seed planter

Industry: Farm Machinery and Equipment

Country: BRAZIL

Product Series:
IXARC – Incremental

Specification:

- Incremental encoder
- HTL
- Cable output
- 360PPR

Competing Technical Solution:
Replace incremental Dynapar AGBR

Benefits of Technical Solution

Agricultural Machines: seed planter. The machine controls the synchronism of the seed reservoir axis, being able to change the planting speed in relation to the seeding speed of the machine without compromising the planting. This results not only in a more efficient process, but also in avoiding seed waste and increasing productivity. Suitable for machines with varying planting speeds.

The encoder is mounted on the lower rear part of the machine.

Reasons for Choosing POSITAL

- Best pricing among competitors
- Good customer access
- Dual Label
- Customization
