FRABA

DATA ENGINEER / DEVELOPMENT DESIGNER DATA TRANSFORMATION
(FULL TIME, REMOTE) (M / F)

Company

FRABA is a group of enterprises focused on providing advanced products for the motion control and industrial automation market. With subsidiaries in Heerlen/ The Netherlands, Aachen and Cologne/ Germany, Slubice/ Poland, Hamilton NJ/ USA, Singapore and Shanghai FRABA is offering global support to its customers worldwide.

Competence

It is our philosophy to offer a challenging yet rewarding work environment for every employee of our team. Total information, dynamic development, competence, and fair sharing are our values. Initiative, ideas, knowledge, energy, and risk taking are our drivers and everybody who has them has the right to make decisions. At FRABA, leadership is not depending on education or hierarchy, but on knowledge and performance of each individual.

As an you will become part of our team in Slubice your field of responsibility will be:

Responsibility

- Build and maintain data pipelines using Azure Synapse
- Support ingestion and transformation of data into ADLS and OneLake
- Perform data modelling and organize data for analysis and downstream systems
- Document data flows, pipelines, and key data processes clearly and accessibly
- Work with business teams (e.g., HR, Finance) to understand data needs and deliver reliable solutions
- Building data models involving data from multiple sources
- Improving own development process, identifying new technologies

If you have the initiative, knowledge, information, energy, and courage to make a decision, we urge you to do so. At FRABA everybody has the chance to become a leader. It is up to you to take your chance.

Requirements

It is our philosophy to hire talented individuals, who are willing to learn and develop their skills, not specialized know-how. As an applicant you should fit into the following profile:

- 2+ years of experience in data engineering or a closely related role
- Proficiency in SQL for data transformation and querying large datasets
- Working knowledge of Python for scripting, automation, or data processing tasks
- Experience with Apache Spark (e.g., running notebooks, transformations, or job orchestration)
- Hands-on experience with Azure Data Factory or Azure Synapse for building and maintaining data pipelines
- Basic understanding of Microsoft Fabric, including OneLake and Lakehouse concepts
- Understanding of data warehousing principles and ETL/ELT processes
- Ability to work independently and take ownership of tasks

- Strong communication skills, especially when working with business stakeholders
- Experience with Power BI, Tableau, or other data visualization tools (nice to have)
- Familiarity with version control (e.g., Git) and basic CI/CD practices (nice to have)
- Good knowledge of English (essential)

We offer

- Modern and friendly work environment,
- Flexible working model (on-line)
- Full-time employment contract.
- Medical package
- Interesting and challenging projects
- Team building events twice a year
