NUCOR CORPORATION DECLARATION

**DIRECTIVE ON THE RESTRICTION OF THE USE OF HAZARDOUS SUBSTANCES
IN ELECTRICAL AND ELECTRONIC EQUIPMENT (RoHS)**

To whom it may concern:

Nucor Corporation declares that the steel substrate produced by all Nucor **Merchant Bar and Rebar, Engineered Bar, Beam and Plate Divisions** does not contain substances that exceed the maximum concentration values restricted by 2002/95/EC (RoHS), 2011/65/EU (RoHS 2) and 2015/863/EU (RoHS 3). In addition, none of the RoHS hazardous substances are intentionally introduced to the substrate during the manufacturing process. These hazardous substances are listed in the table below along with their RoHS Maximum Concentration Values:

Substance	RoHS Maximum Concentration Values (by weight in homogeneous material)
Cadmium & Cadmium Compounds	0.01%
Hexavalent Chromium	.1%
Lead & Lead Compounds	.1%
Mercury & Mercury Compounds	.1%
Polybrominated Biphenyls	.1%
Polybrominated Diphenyl Ethers	.1%
Bis(2-ethylhexyl) Phthalate (DEHP)	.1%
Butyl benzyl Phthalate (BBP)	.1%
Dibutyl Phthalate (DBP)	.1%
Diisobutyl Phthalate (DIBP)	.1%

Please note that this Declaration does not extend to any of the above listed products that are coated by Nucor. Chemical coating treatment may contain hazardous substances that do not comply with the Directive. If requested, Nucor may be able to produce RoHS-compliant coated products with a chemical treatment that conforms to the limits listed above.

Nucor supplies hazardous chemical information on its safety data sheets (SDS), which are provided to each purchaser, and are available at <https://www.nucor.com/certifications/> or upon written request.

If you need additional information on a specific Nucor steel product, please contact:
