Important Information About Documentation

- Black out any Social Security numbers, account numbers, and financial information.
- Some states and county clerk offices prohibit the photocopying of vital records, such as birth certificates or marriage certificates. Copying, for this purpose, generally includes documents scanned or faxed, as well as photocopied.
- Confirm whether or not it is allowed to copy vital records with the vital records office that issued the record in question.
- If copying is not allowed, we recommend that you obtain a non-certified vital record which is usually available at a reduced cost compared to the certified vital record cost. The non-certified copy can be sent by U.S. mail to the address below to complete the verification process. Documents mailed will not be returned.
