Git/TFS

SQL, MySQL

Azure, AWS

Azure DevOps, Octopus,
Teamcity

Episerver, Contentful

EXPERIENCE

Today

SENIOR DEVELOPER - Nansen

At Nansen, I contribute to projects through every phase of the project pipeline. This includes sales, discovery, delivery, launch and maintenance. I led approximately 5 larger projects over this period and contributed to over a dozen more. These projects included both web and mobile applications.

Alongside contributing to client projects, I led the product development of applications sold in a CMS Marketplace. I also led the development of several POC projects that leveraged IoT, Bluetooth, and AR technologies.

12/2014

Web Developer - Adage Technologies

At Adage, I developed enterprise scale websites for clients in various industries. This required adapting to legacy systems, and integrating new functionality.

EDUCATION

5/2013

M.S. Computer Science

Purdue University, Calument, IN

5/2011

B.S. Economics

Purdue University, West Lafayette, IN

AWARDS & CERTIFICATIONS

Episerver EMVP

Awarded to ~50 individuals globally, this award recognizes leaders in the Episerver CMS platform.

Contentful Certified Developer

A Certificatied Developer on the Contentful CMS Platform.

PROJECTS

davidboland.site

A personal/professional blog, built with .NET Core, Piranha CMS, hosted on Azure.

Pixzle

A Native iOS app built in Obj-C. This was a gamified photo sharing application that sent photos between users as puzzles.
