WHO WE ARE

DISPATCH COFFEE

WHO WE ARE

WE WANT YOU TO KNOW WHERE YOUR COFFEE COMES FROM.

We're a small (but ambitious!) Montreal-based roaster with a mission to bring positive change to coffee systems through making responsibly sourced and high quality coffee accessible to everyone.

When it comes to sourcing, our approach is radically focused on exceptional quality, transparency, and (actual) fair trade practices. Coffee is produced in over 50 countries in some of the world's poorest nations. We've carefully selected 13 of these coffee-producing countries whose export earnings and populations rely heavily on the production of commodity coffee. This is where our support of specialty coffee can most significantly stimulate a better economic outlook.

DISPATCH COFFEE

WHO WE ARE

BETTER COFFEE, INSIDE OUT.

We convert all of our green coffee beans into delightful, roasted coffee at our facilities located in the heart of Montreal. There, we develop a personalized roasting profile to capture the unique character for each of the coffees on our menu. This process aims to highlight the varying complexity, sweetness, and body of each coffee we present on our menu.

We then roast in small batches, achieving our signature desired profile—which we describe as a balanced, medium-light roasted coffee that is designed to be suitable for all brew methods. We roast every other day to ensure your coffee is always tasting bright and fresh.

Ultimately, we believe in the power of doing good. Our business is founded on the belief that coffee could be better: fairer for farmers, more delicious, transparent and educational for consumers.

A close-up photograph of a person's hand holding a white, rectangular box. The hand is positioned on the left side of the frame, with the thumb and index finger visible. A silver ring is worn on the ring finger. The box is tilted diagonally upwards and to the right. The word "DISPATCH" is printed in large, bold, black, sans-serif capital letters on the front of the box. The background is a plain, light-colored surface.
