Dear Kris Vandermeulen

Thank you for placing your order with SK Partner Lab 01 .

We need a few more pieces of information to get the order underway. Click on the following link that directs you to the page where you will be able provide the necessary information.

[Configure your order!](#)

Please get in touch with your contact/agent at SK Partner Lab 01 in case you have any questions.

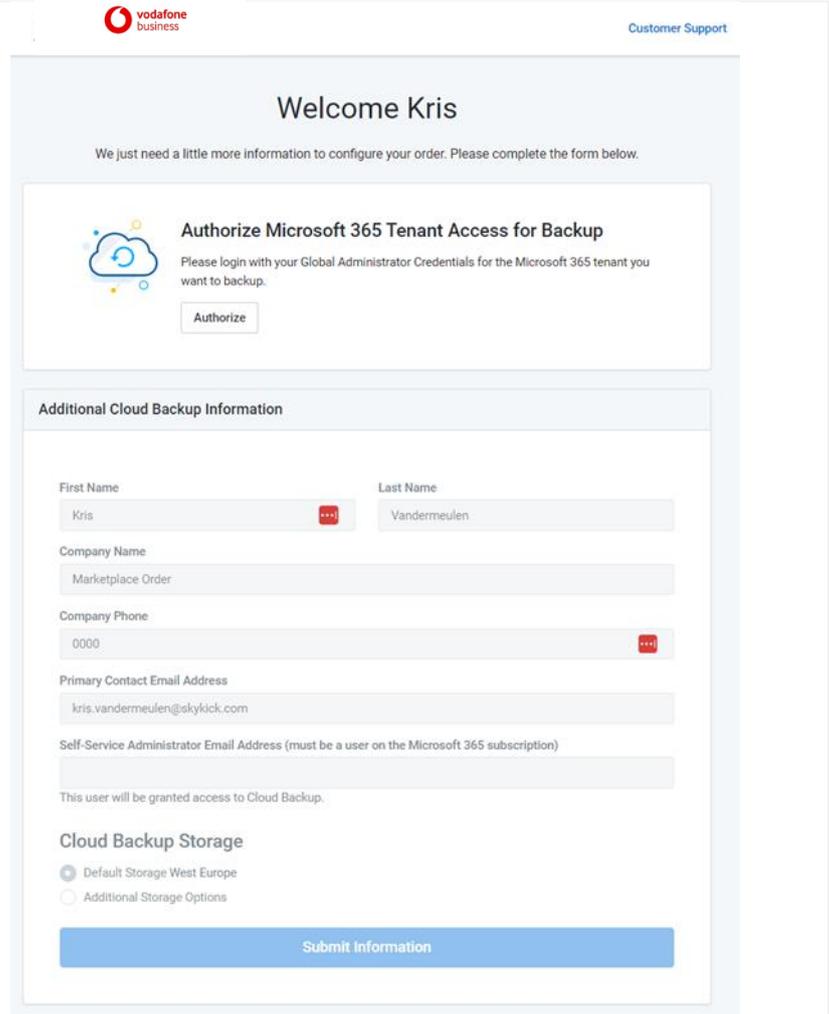

Regards,

SK Partner Lab 01

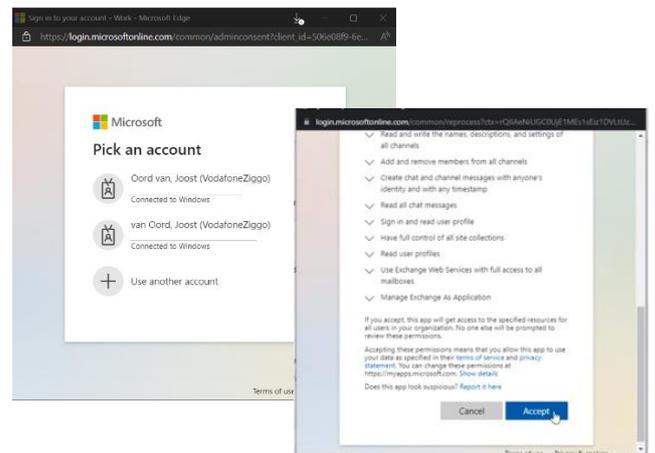

STEP 3

Clicking the link will take you to the configuration page.

STEP 4

Click "Authorize" and select the Global Admin account from the list. If it's not listed, select "Use another account". Please enter your **Microsoft 365 Global Admin credentials** and accept the Permissions. This automatically detects all current mailboxes, folders, and files in your company that are available for backup using the auto-discovery feature.

Important instructions:

- If you are backing up SharePoint data, make sure that the global administrator has permissions on all site collections.
- To back up versions in SharePoint and OneDrive for Business, versioning must be enabled for SharePoint and OneDrive for Business.
- The "Primary contact email address" must match the email address you provided when you purchased Vodafone Cloud Backup on the Marketplace (see step 4 "Buy Vodafone Cloud Backup in the Vodafone Marketplace")

STEP 5

In the "Self-Service Administrator Email Address" field, enter the email address of the employee who, as a **self-service administrator**, manages the backups for your company. This person needs to be a user in the tenant and gets access to the self-service backup portal. As a storage location for your cloud backup, "Location West Europe" (Dublin / Amsterdam) is selected by default and **recommended as the hosting location**.

The screenshot shows the configuration page for a Vodafone Cloud Backup. At the top, there is a 'vodafone business' logo and a 'Customer Support' link. The main heading is 'Welcome Kris'. Below this, a message says 'We just need a little more information to configure your order. Please complete the form below.' The primary section is 'Authorize Microsoft 365 Tenant Access for Backup', which includes a 'Reauthorize' button and a green checkmark indicating 'Backup tenant access authorized'. The 'Additional Cloud Backup Information' section contains several input fields: 'First Name' (Kris), 'Last Name' (Vandermeulen), 'Company Name' (Marketplace Order), 'Company Phone' (0000), 'Primary Contact Email Address' (kris.vandermeulen@skykick.com), and 'Self-Service Administrator Email Address (must be a user on the Microsoft 365 subscription)'. The latter field is highlighted with a red border and shows a dropdown menu with 'AdeleV@M365x45822542.OnMicrosoft.com' selected. Below this, there are radio buttons for 'Default Storage West Europe' (selected) and 'Additional Storage Options'. A 'Submit Information' button is at the bottom.

Important instructions:

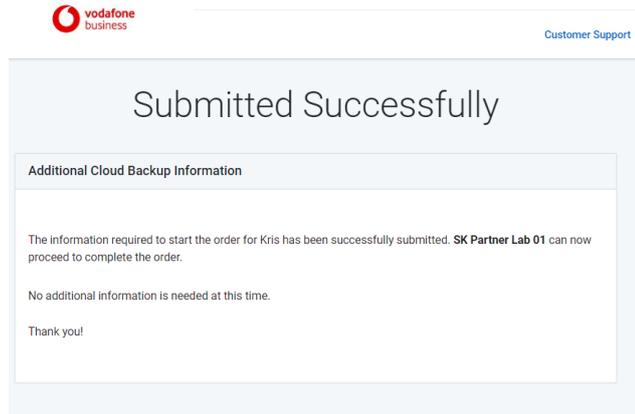

- Type the first 3 letters of a user and select from the dropdown
- Do not Copy Paste an email address
- Only Users discovered in the M365 tenant with an email address will be displayed
- The user selected does not need any special permissions in M365 or Azure AD

Note: The self-service administrator email address must be registered on the same tenant as the global administrator. It must also be an Exchange online mailbox.

STEP 6

Once you have clicked on "Submit Information", you will receive a confirmation that the information has been sent successfully.

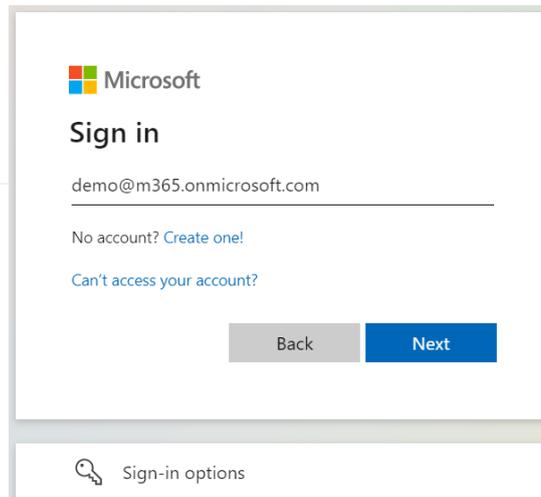

STEP 7

After completing the previous steps, the self-service administrator can access the **Vodafone Cloud Backup self-service portal** via the following link:

<https://vodafoneie.backupmycloud.com/>

STEP 8

You can log into the self-service portal using the M365 Credentials of the Self Service Admin.
