BeyondTrust

PRIVILEGE MANAGEMENT FOR WINDOWS & MAC QUICKSTART

OUT OF THE BOX IMPLEMENTATION INCREASES SECURITY OVERNIGHT

Flexible Policy User Roles
Low flexibility (temps, contractors), medium flexibility (sales) and high flexibility (engineering, IT, QA)

Exception Handling Process
User enters an IT-generated PIN code and credentials to install applications

Tailored Workstyles
Elevate only the applications each user requires and allow only trusted applications to run

The QuickStart policy offers a smarter approach to Privilege Management for Windows and Mac deployment across your desktop, laptop, and server environments. Leveraging data from thousands of deployments over a decade, QuickStart is unique in the industry, allowing you to operationalize overnight.

QuickStart Policy Overview

- Greatly reduces initial implementation effort
- Automatically approves business applications
- Elevates privileged applications and tasks
- Seamlessly identifies trusted applications
- Blocks and gates untrusted applications for approval
- Replaces Windows User Account Control with customizable messages
- Causes minimal impact to end users and IT staff alike
- Collects and analyzes genuine user behavior
- Facilitates workstyle design (role-based access)
- Enables easy refinement of configurations over time

Optimize Your Investment

With QuickStart deployment, you'll benefit immediately from BeyondTrust's privilege management and application control capabilities. With a small number of rules catering to the majority of use cases, exceptions are handled with customizable messages that replace Windows UAC prompts.

Minimal Disruption, Instant Security Benefits

Remove local admin rights across your organization with three simple user workstyles catering to differing flexibility requirements. Users are asked for varying levels of justification, allowing them to continue to work uninterrupted with significantly increased security. And unknown or untrusted applications can be blocked automatically or allowed to run with justifications based on user role.

PRIVILEGE MANAGEMENT FOR WINDOWS & MAC QUICKSTART

Deliverables	Tier 1	Tier 2	Tier 3
Project Kick-Off Workshop	✓	✓	✓
Install Privilege Management for Windows & Mac Management Console GPO, ePO, PMWM Cloud, BeyondInsight *	✓	✓	✓
