

Integrated Security

Identity Governance & Privileged Access Management

What Are Common Challenges?

As IT environments grow more complex, it becomes virtually impossible to track ever-changing relationships between users, devices, managed accounts, and their corresponding levels of access.

The lack of transparent visibility puts enterprises at risk of security breaches and failed audits.

52%

of organizations say **identities have grown over fivefold** in the past 10 years¹

49%

have an **identity program missing the best policies and procedures**²

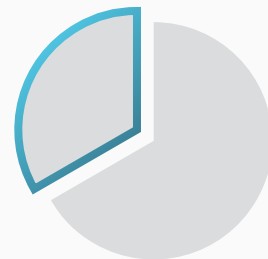

only 15%

have a **fully automated identity process** including password management²

80%

of **breaches** involve **privileged credentials**³

1 out of 3

organizations are missing **self-service password automation**²

64%

of **companies** believe they've likely had either a direct or indirect **breach due to employee access** in the last year⁴

How Can You Address These Security Challenges?

Today's CISOs need to be able to answer:

1

WHO

has access to what?

2

SHOULD

they have that access?

3

WHAT

are they doing with their access?

93%

of companies believe it's important for **PAM solutions to be integrated**⁴

63%

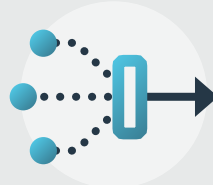

believe "integration with the tools we already have" **would enhance security**⁴

46%

think their current solutions are **fully integrated**⁴

Strengthen Security with BeyondTrust & SailPoint Integrations

Businesses need security solutions that can **effectively integrate** to unlock advanced use cases:

STREAMLINE PROCESSES

CREATE EFFICIENCIES

BETTER ACHIEVE SECURITY GOALS

THE SOLUTION

The **BeyondTrust Privileged Access Management & SailPoint Identity Governance** integrations efficiently determine suitable access and appropriate privilege use.

BeyondTrust + SailPoint

AUTOMATED ACCESS

Empower IT admins, specialists and executives with the privileged access they need to do their job

CENTRALIZED MANAGEMENT

Provide a complete, centralized view of each identity's access across all standard and privileged, shared or system accounts

REDUCED RISK

Continuously remove unnecessary privileged accounts as users switch jobs or leave the company

Strengthen your organization's overall security posture by providing enhanced visibility and automated governance controls for all of your users.
