Our Product

Our Accessibility Audit is meticulously crafted to ensure your website meets the highest global accessibility standards, including WCAG 2.1, EN 301 549 and optionally ADA and Section 508 for the US market. We help you to prepare for upcoming updates by auditing with WCAG 2.2 requirements in mind

Our service combines the precision of manual evaluations with the efficiency of automated tools.

By conducting a thorough review of your website, our expert team identifies critical accessibility barriers, ensuring your digital presence is accessible to all users, including those with disabilities.

PUSH BASED

The Audit Behind Your Inclusivity

Navigating Accessibility
Where Compliance Meets Usability

Our expert team will identifies critical accessibility barriers, making sure your digital presence is accessible to all users.

- ✓ Crafted to ensure your website meets the highest global accessibility standards.

- ✓ This includes WCAG 2.1, EN 301 549 and optionally ADA and Section 508 for the US market.
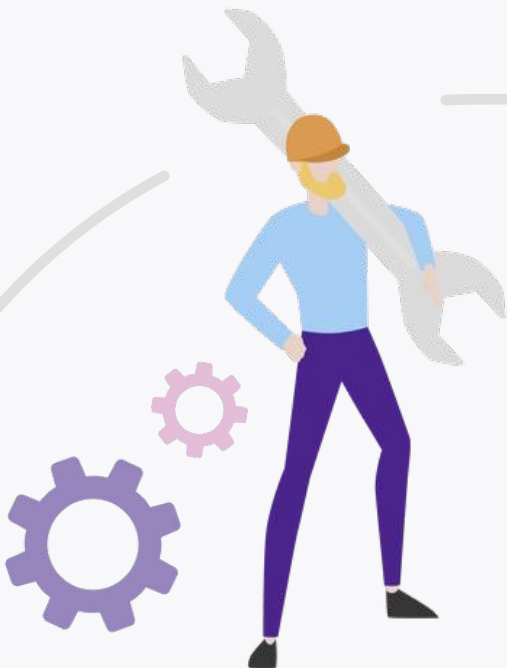

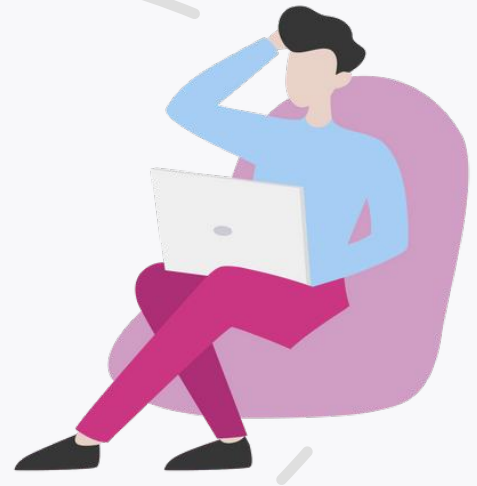

- ✓ We also help you to prepare for upcoming updates by auditing with WCAG 2.2 requirements in mind.

Automated & Manual

We Help You Meet Global Accessibility Standards

Our approach to accessibility auditing is detailed and user-focused, ensuring that your website or application is not only compliant with legal standards but also genuinely accessible and usable for all individuals.

In our toolkit, we leverage advanced tools such as browser extensions for enhanced testing capabilities, VoiceOver for screen reader assessments, bookmarklets for quick diagnostic checks, and Chrome DevTools for in-depth analysis of CSS, rendering, and the accessibility tree, providing a comprehensive review of your digital space.

Step-by-Step to Web Inclusivity

1 Initial Consultation

We start by understanding the unique needs and goals of your project. Then we will discuss the scope and the set of pages that will be audited.

2 Automated and Manual Testing

Our comprehensive testing strategy includes automated scans complemented by manual testing. This approach ensures thorough coverage of WCAG 2.1 and EN 301 549 guidelines and real-world usability by employing assistive technologies.

3 Detailed Findings and Recommendations

The audit culminates in a detailed report featuring an executive summary, audit methodology, prioritized findings, compliance status, and a technical appendix with screenshots and improvement suggestions.

4 Post-Audit Meeting

Following the audit, we will hand over the audit report in a meeting to discuss the findings, address any concerns, and advise on the implementation of our recommendations.

From Audit to Accessible: Transforming Digital Spaces

Detailed Audit Report

A comprehensive examination of your website against WCAG, EN 301 549, and optional for the US market ADA, and Section 508, pinpointing areas of non-compliance and offering actionable insights for improvement.

Barrier Identification and Analysis

Our audit delves deep into your digital assets, identifying specific accessibility barriers, from navigation issues to content readability, ensuring no detail is overlooked.

Prioritized Remediation Plan

We categorize identified issues by their impact on accessibility, providing you with a prioritized roadmap for addressing these barriers effectively and efficiently.

Technical Guidance and Recommendations

Receive detailed suggestions for technical improvements, including code snippets, design adjustments, and strategies to meet accessibility standards.

Follow-Up Review and Support

After implementing our recommendations, we offer a follow-up review to assess improvements, ensuring lasting compliance and enhanced user experience.
