Information for Interim Tests

Interim papers have been scheduled in to the year-long 11Plus course planner and should be completed only when they appear in the course planner.

Each interim test is broken down into maths, English, verbal reasoning and non-verbal reasoning papers. Each paper includes a sample of questions from the topics taught in previous weeks.

ALL TESTS WILL BE COMPLETED AT HOME. Please make sure you bring your book to your lesson the week after a test has been completed, for marking and review.

Your tutor will inform you when a test should be completed.

Answering Questions

Most questions are multiple-choice. You should circle the correct answer for each question. Mistakes should be rubbed out carefully,

An example is shown below, showing that 'C. u' is the chosen answer for this question.

1. pound moth

Marking and Feedback

Once you have completed an 'interim test' you will mark it alongside your tutor. Add your score next to each test on the score sheet on Page 4.

Reflecting helps you to develop your skills and review their effectiveness. To be self-aware is to be able to realistically assess your strengths, areas for development and set goals, while maintaining a positive mindset. You will get some time after each test for self-reflection and an opportunity to use Compass to work on any tricky topics from the test.

There is dedicated time within each course planner to mark and review each test. **If you would like access to the answers for each of the tests within this book, please scan the QR code below.**

INTERIM TEST 1 – ENGLISH

- Interim Test 1 – English test includes 15 questions.
- You have **15 minutes** to complete this test.
- Circle the correct answer.

Read the extract then answer the questions that follow.

The Old Gentleman

Here in the deep silence of the sleeping country the only things that went by were the trains. They seemed to be all that was left to link the children to the old life that had once been theirs.

Straight down the hill in front of Three Chimneys the daily passage of their six feet began to mark a path across the crisp, short turf. They began to know the hours when certain trains passed, and they gave names to them. The 9.15 up was called the Green Dragon. The 10.7 down was the Worm of Wantley. The midnight town express, whose shrieking rush they sometimes woke from their dreams to hear, was the Fearsome Fly-by-night. Peter got up once, in chill starshine, and, peeping at it through his curtains, named it on the spot.

It was by the Green Dragon that the old gentleman travelled. He was a very nice looking old gentleman, and he looked as if he were nice, too, which is not at all the same thing. He had a fresh-coloured, clean-shaven face and white hair, and he wore rather oddshaped collars and a top-hat that wasn't exactly the same kind as other people's. Of course the children didn't see all this at first. In fact the first thing they noticed about the old gentleman was his hand.

It was one morning as they sat on the fence waiting for the Green Dragon, which was three and a quarter minutes late by Peter's Waterbury watch that had been given him on his last birthday.

"The Green Dragon's going where Father is," said Phyllis; "if it were a really real dragon, we could stop it and ask it to take our love to Father."
"Dragons don't carry people's love," said Peter; "they'd be above it."
"Yes, they do, if you tame them thoroughly first. They fetch and carry like pet spaniels," said Phyllis, "and feed out of your hand. I wonder why Father never writes to us."

"Mother says he's been too busy," said Bobbie; "but he'll write soon, she says." "I say," Phyllis suggested, "let's all wave to the Green Dragon as it goes by. If it's a magic dragon, it'll understand and take our love to Father. And if it isn't, three waves aren't much. We shall never miss them."

So when the Green Dragon tore shrieking out of the mouth of its dark lair, which was the tunnel, all three children stood on the railing and waved their pocket-handkerchiefs without stopping to think whether they were clean handkerchiefs or the reverse. They were, as a matter of fact, very much the reverse.

And out of a first-class carriage a hand waved back. A quite clean hand. It held a newspaper. It was the old gentleman's hand.

Read the poem then answer the questions that follow.

***I Wandered Lonely as a Cloud* by William Wordsworth**

I wandered lonely as a cloud
That floats on high o'er vales and hills,
When all at once I saw a crowd,
A host, of golden daffodils;
Beside the lake, beneath the trees,
Fluttering and dancing in the breeze.

Continuous as the stars that shine
And twinkle on the milky way,
They stretched in never-ending line
Along the margin of a bay:
Ten thousand saw I at a glance,
Tossing their heads in sprightly dance.

The waves beside them danced; but they
Out-did the sparkling waves in glee:
A poet could not but be gay,
In such a jocund company:
I gazed – and gazed – but little thought
What wealth the show to me had brought:

For oft, when on my couch I lie
In vacant or in pensive mood,
They flash upon that inward eye
Which is the bliss of solitude;
And then my heart with pleasure fills,
And dances with the daffodils.

Read the sources and answer the comprehension questions that follow.

Source 1: An illustration titled The Silent Highwayman published in Punch magazine.

Source 2: A Description of the Great Stink of 1858.

During the Great Stink of 1858, the combination of extreme pollution and the hot summer weather created a perfect breeding ground for disease, particularly cholera. Cholera is a highly contagious and deadly bacterial infection that spreads through contaminated water sources. As the foul-smelling waters of the Thames continued to seep into the city, the risk of cholera outbreaks skyrocketed. Cholera had already been a recurring problem in London, causing numerous deaths in previous years.

The situation during the Great Stink became so dire that the death toll rose significantly, leading to widespread fear and panic among the population. The lack of proper sanitation and clean drinking water exacerbated the spread of the disease, resulting in a tragic loss of life.

It was the devastating impact of cholera and the mounting public health crisis that finally compelled the government to take urgent action. The construction of the new sewer system, masterminded by engineer Joseph Bazalgette, aimed not only to eliminate the unbearable smell but also to prevent future cholera outbreaks and improve overall public health in the city. The implementation of this modern sewer system was a crucial step forward in London's approach to managing wastewater and preventing further loss of life from waterborne diseases like cholera.

Source 1: A Description of Guy Fawkes' Childhood.

Guy Fawkes was born in April 1570 in England, during a time of religious and political tension. His family was Catholic, but the government favoured Protestantism. Growing up, Guy witnessed how Catholics faced discrimination and persecution, which deeply affected him. As he became older, he felt a strong sense of loyalty to his faith and grew increasingly frustrated with the government's unfair treatment of Catholics. This discontent led him to join a plot to rebel against the king and the Protestant leaders. Unfortunately, the plan, known as the Gunpowder Plot, failed, and Guy was captured. His childhood experiences and beliefs played a significant role in shaping his actions during those tumultuous times.

March 1603	January 1604	April 1604	February 1605
Elizabeth I died. Her cousin became King James I of England.	Robert Catesby started planning the Gunpowder Plot.	Guy Fawkes was recruited as an explosives expert.	A tunnel was dug towards Parliament. The gunpowder was smuggled inside.
October 1605	**November 1605**	**5th November 1605**	**31st January 1606**
Lord Monteagle received a letter of warning.	The King was shown the letter and The King's Men searched the vaults.	Guy Fawkes was arrested and questioned. He was found guilty.	Guy Fawkes was executed for treason.

Source 4: A description of Guy Fawkes Night.

Guy Fawkes Night, also known as Bonfire Night, is a traditional British celebration held on November 5th each year. It commemorates the infamous Gunpowder Plot of 1605, an attempt to blow up the Houses of Parliament in London. The plot was orchestrated by a group of conspirators, including Guy Fawkes.

On this night, people across the United Kingdom gather to mark the occasion with colourful displays of fireworks, bonfires, and community festivities. The festivities typically begin after dark when the sky is illuminated with a dazzling array of fireworks, symbolising the failed explosion that Guy Fawkes and his fellow plotters had planned.

Bonfires are a central part of the celebrations, and communities construct large pyres to burn effigies of Guy Fawkes. These effigies are usually made of straw and dressed in old clothes, representing the man who aimed to destroy the Houses of Parliament. Children, and sometimes even adults, excitedly collect pennies by asking for a "penny for the Guy," which they use to buy fireworks or treats for the evening.

As the bonfires crackle and the fireworks light up the night sky, families and friends come together to enjoy warm drinks, traditional food like toffee apples and parkin cake, and share stories about the historical significance of the event. Many people wear masks or Guy Fawkes masks made famous by the graphic novel "V for Vendetta," which has become a symbol of protest in modern times.

Despite its historical context, Guy Fawkes Night has evolved into a vibrant celebration of British culture and a time for communities to unite in joyous festivities. It serves as a reminder of the importance of preserving history and the enduring impact that past events can have on present-day traditions.

Source 1: Cleopatra: Rise to Power and Alliance with Julius Caesar

In 51 BCE, Cleopatra ascended to the throne following her father's death. Her father had designated her and her elder brother, Ptolemy XIII, as co-rulers. However, after three years, Cleopatra was forced into exile by her brother's supporters. Hearing of Julius Caesar's arrival in Egypt, she sought an audience with him and convinced him to support her cause. With Caesar's assistance, she successfully reclaimed her throne. In 47 BCE, after Ptolemy XIII's death, Caesar appointed Cleopatra's younger brother, Ptolemy XIV, as her joint ruler.

During the same year, Cleopatra gave birth to a son whom she named Caesarion, meaning 'little Caesar.' When Caesar returned to Rome, Cleopatra accompanied him and resided in his villa. Caesar even honoured her by placing a golden statue of her in his ancestral temple.

Tragically, in 44 BCE, Julius Caesar was killed. After his death, Cleopatra returned to Egypt. Shortly after, her brother Ptolemy XIV also passed away, leading to speculations that Cleopatra might have played a role in his death to secure her son's position as a joint ruler.

Source 2: An illustration of Cleopatra's death.

Source 3: Antony and Cleopatra: Love, Power, and the Fall of an Empire.

After the assassination of Julius Caesar in 44 BCE, the political situation in Rome and Egypt became tumultuous. In Rome, power struggles occurred, leading to a period of political instability known as the Roman Civil Wars. Mark Antony, a prominent Roman general and politician, emerged as one of the key figures in this chaotic era.

In 41 BCE, Antony formed a political alliance with Cleopatra, visiting her in Egypt. Their relationship grew romantic and resulted in the birth of three children. Antony eventually recognised Caesarion, Cleopatra's son with Julius Caesar, as a legitimate heir to Caesar's name and legacy.

In 37 BCE, Antony and Cleopatra officially formed a political and military alliance known as the Donations of Alexandria. In this proclamation, Antony granted various places, including parts of the Roman Republic, to Cleopatra and their children. This action created significant controversy and added fuel to the tensions between Antony and Octavian, Caesar's grandnephew and adopted heir, who viewed Antony's actions as a challenge to his authority.

The alliance between Antony and Cleopatra and the perceived threat to Rome's stability led to the outbreak of the Final War of the Roman Republic. In 31 BCE, the forces of Octavian (later known as Augustus) clashed with those of Antony and Cleopatra in the Battle of Actium. Octavian emerged victorious, and Antony and Cleopatra were forced to retreat to Egypt.

Source 4: Key dates.

31 BCE	31 BCE (continued)	30 BCE
Following the devastating defeat at Actium, Cleopatra realised that she could not depend on Antony to safeguard her kingdom's stability any longer. She engaged in a conversation with Octavian, who proposes protection for her in exchange for Antony's death.	In an attempt to gain favour with Octavian, Cleopatra staged a plot that led to Antony's life-threatening actions, and he ultimately died. Several months later, Cleopatra also died, choosing a different fate to preserve her dignity and sovereignty.	Octavian dispatched Roman forces to track down and eliminate Caesarion, successfully bringing an end to the Ptolemies' reign in Egypt.
