While Q2 is flat vs. year ago behind Days of Cover adjustments at distributor, Q2 has grown 7% vs. Q1 showing a healthy trend on business contributed by 'Disposables'. The Company will continue to focus on investing in consumer centric touch points with an aim to maximize shareholder's return.

While the topline was growing, the Company also remained focused for bottom line growth. The management has placed special emphasis to curtail overall marketing spend pool by optimization without impacting the business growth. The administrative expenses were in-line with comparative period. Key challenge for H2 of the fiscal year will be negotiating prices with supplier which are expected to go up.

A review of condensed interim financial statement consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. Based on our review, nothing has come to our attention that causes us to believe that the accompanying interim financial statements as of and for the half year ended December 31, 2019 is not prepared, in all material respects, in accordance with the accounting and reporting standards as applicable in Pakistan for interim financial reporting.

3. SIGNIFICANT ACCOUNTING POLICIES

3.1 The accounting policies and methods of computation adopted in the preparation of these condensed interim financial statements are the same as those applied in the preparation of the annual audited financial statements of the Company for the year ended June 30, 2019, except for the impact of IFRS-16 (note 3.2).

3.2 Changes in accounting policies - IFRS 16

3.2.1 Adoption of IFRS-16 - Leases

The Company has adopted IFRS 16 retrospectively from July 1, 2019, but has not restated comparatives for the 2019 reporting period, as premised under the specific transitional provisions in the standard. The impact of adoption of this standard is therefore recognized in the opening statement of financial position on July 1, 2019.

On adoption of IFRS 16, the Company recognized lease liability which had previously been classified as 'operating leases' under the principles of IAS 17 Leases. This liability was measured at the present value of the remaining lease payments, discounted using the lessee's incremental borrowing rate as of July 1, 2019. The lessee's incremental borrowing rate applied to the lease liability on July 1, 2019 was 11.48%.

Assets and liabilities arising from a lease are initially measured on a present value basis. Lease liabilities include the net present value of the following lease payments:

- fixed payments (including in-substance fixed payments), less any lease incentives receivable;
- variable lease payment that are based on an index or a rate;
- amounts expected to be payable by the lessee under residual value guarantees, if any;
- the exercise price of a purchase option if the lessee is reasonably certain to exercise that option;
- payments of penalties for terminating the lease, if the lease term reflects the lessee exercising that option.

For the Half Year Ended December 31, 2019

The lease payments are to be discounted using the interest rate implicit in the lease. If that rate cannot be determined, the lessee's incremental borrowing rate is used, being the rate that the company would have to pay to borrow the funds necessary to obtain an asset of similar value in a similar economic environment with similar terms and conditions.

Right of use assets are measured at cost comprising the following:

- the amount of the initial measurement of lease liability;
- any lease payments made at or before the commencement date less any lease incentives received;
- any initial direct costs; and
- restoration costs.

From July 1, 2019, leases are recognized as a right of use asset and a corresponding liability at the date at which the leased asset is available for use by the company. Each lease payment is allocated between the liability and finance cost. The finance cost is charged to statement of profit and loss over the lease period so as to produce a constant periodic rate of interest on the remaining balance of the liability for each period. The right of use asset is depreciated over the shorter of the asset's useful life and the lease term on a straight line basis.

The effect of this change in accounting policy is as follows:

December 31,	July 01
2019	2019

3.2.2 Impact on statement of financial position:
