

Tackling Your IT Security Threats

Explore highlights from the latest government and IBM cyber security surveys.

There's also pro tips from our Xerox IT Services security team to help ensure you remain safe and protected.

WHAT'S HAPPENING?

As the cyber security threat landscape continues to evolve, businesses of all sizes are becoming increasingly vulnerable to attack. The Cyber Security Breaches Survey 2022 ⁽¹⁾ from the UK government has found:

82% of UK business leaders rate cyber security as a **'very high' priority**

HOW WE CAN HELP
Our Virtual Chief Information Security Officer provides Board level guidance and supports the organisation through compliance measures.

Only **19%** of organisations have a **proactive approach to incident management** in place

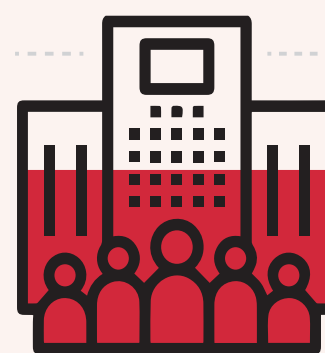

HOW WE CAN HELP
We will help develop a bespoke response plan to minimise the potential damage and downtime, tied in with the organisation's existing disaster recovery, business continuity and crisis management plans.

39% of UK businesses identified a **cyber-attack**

HOW WE CAN HELP
We bring market-leading toolsets and enterprise-level security expertise normally out of reach to smaller organisations in a tailored package to maximise protection - regardless of your size.

31% of UK businesses experience **an attack on a weekly basis**

HOW WE CAN HELP
Avoid costly breaches and reduce insurance costs, while retaining your certifications and ensuring compliance, with costs spread evenly through the year.

54% of organisations have **actively identified cyber security risks**

HOW WE CAN HELP
Our Vulnerability Management as a Service provides on-going, enterprise-level scanning providing real-time analysis and reporting (VMaaS).

WHAT'S THE IMPACT ON BUSINESSES?

If compromised, the financial and reputational damage can significantly affect businesses and can take years to overcome. The IBM Cost of a Data Breach Report 2021 ⁽²⁾ highlights the financial impact of a breach.

Malicious attacks cost on average **£3.7M**

HOW WE CAN HELP
Our VMaaS provides on-going, enterprise-level scanning with real-time analysis, reporting of any vulnerabilities and immediate remediation recommendations to minimise threats across the business.

In the UK, the overall cost of breaches **increased by**

19.7%

HOW WE CAN HELP
We provide security services to maximise protection right-sized for your needs.

The average cost of lost business

↓ £1.24M

HOW WE CAN HELP
Penetration testing simulates cyber-attacks against all IT systems to verify your current security measures and check for potential exploitations.

Average cost of a breach where organisation had not undergone digital transformation was

£3.9M

HOW WE CAN HELP
We transform your IT infrastructure, processes and user experiences for an agile, secure, flexible, modern workplace.

Phishing was the second most costly breach averaging

£3.6M

HOW WE CAN HELP
Security Awareness Training and Testing as a Service (SATaaS) combines interactive security training and simulates phishing attacks on users, creating a rigorous approach to empower users to become human firewalls. Watch our on-demand [webinar](#) for more information.

HOW'S IT HAPPENING?

Two of the biggest factors that contribute to the increasing threat landscape and breaches occurring are the shift to remote working and credentials such as passwords being compromised by threat actors.

Remote working is a factor in **17%** of breaches

HOW WE CAN HELP
Build and Configuration Reviews encompass all IT infrastructure components to identify any potential vulnerabilities, misconfigurations, or design flaws in line with CyberEssentials and CIS standards.

20% of breaches were due to **compromised credentials**

HOW WE CAN HELP
Once baseline testing and training has been completed, a Virtual Risk Officer will create a report on where weaknesses need addressing.

HOW CAN WE HELP?

We can work in partnership with you to design, implement and manage a cyber security solution that helps you protect your critical data, create robust defences and strengthen your cyber resilience.

Our collaborative approach The three-phased process ensures your needs are always front and centre

Avoid falling victim to phishing attempts

Watch our 'Beyond Phishing' webinar to explore how establishing a culture of security can help your business harden its defences against phishing and mitigate the risks of unnecessary disruption.
