

15KA ARC FLASH SUPPRESSION BLANKET

OEL™

OEL's Arc Suppression Blankets are used as a barrier for protection from the explosive and incendiary effects of electrical arcs and flashes. They can be used for worker protection in underground vaults, switchyards and other locations where there is a potential of exposure to explosive electrical discharges.

OEL Worldwide Industries Arc Flash Suppression Blankets are the highest quality in the electrical safety industry. Designed to be used for the most critical working conditions. **CAUTION:** Because of the unpredictability of electrical discharges, the Arc Suppression Blanket may not totally contain arcs and flashes, but only reduce or limit exposure and incendiary effects. In such cases, injuries may still occur, even when the blanket is properly used.
