

For every place that matters

Global leaders in smart and sustainable access solutions

A trusted partner for safe, secure and sustainable access solutions – for every place that matters.

When you need innovative, reliable access and security solutions – in hotels, shops, sporting venues, airports, hospitals, offices or at home, we are there.

Where's your place? The answer for almost everyone is the same: we feel happiest in a place where we are both free and secure. A place where we can move around safely and seamlessly, without obstacles, worries or confusion. dormakaba enables this precious experience for buildings, spaces and communities around the globe, so that people everywhere can feel safe and secure in the places that matter to them. To put it in one sentence: dormakaba's vision is to be the trusted partner worldwide for safe, secure and sustainable places where people can move seamlessly.

Our global communities are always on the move: each year, the equivalent of more than half the world's population goes through an airport security gate. Each day, 11,000 new buildings are completed. The global construction industry will more than double in size this decade, to more than USD 14 trillion. By 2050, two-thirds of the world's population will be living in cities. Such places matter, deeply – they are where our global communities meet, work, and enjoy life. They are the stages for our greatest and most memorable moments. And dormakaba is right there as the partner at your side to make these moments count.

Advanced solutions are our passion

With over 160 years of experience with access and security in a variety of markets, we continue to innovate and deliver the best products, solutions and services to our customers around the world.

In our increasingly digitized and populated world, security is no longer a mechanical process but an integral part of the urban infrastructure. Anything from crowd management to digital protection and, more recently, hygiene and disaster preparedness can be security considerations.

With the right technologies and partners, cutting-edge access management tools can support our societies' transition into a smart and sustainable future, maximizing our security whether we need protection in crowds or clouds.

We reimagine access
to enhance customer
value and experience for
a sustainable building
lifecycle

We are helping to push the boundaries of what's possible.

With a long tradition of innovation and engineering expertise, we strive to meet our customer's business needs and empower them.

Balancing form and function? We enable both.

We reimagine access to deliver the vision of a building while ensuring productivity, convenience, safety and security without altering the design or functionality.

Integrated access at every stage of the building lifecycle.

We integrate planning, management and maintenance of access. We do so by leveraging connectivity, integration and ecosystems as the foundation for additional customer benefits around experience and productivity across the building lifecycle.

Making the flow of people as effortless as possible.

We enable a safe and secure flow of people throughout their premises. We use innovative access solutions to make every journey flow, to keep premises safe while allowing people to move smoothly and efficiently.

Supporting your needs for a sustainably built environment.

We are committed to championing sustainability in everything we do, from producing more sustainable solutions and fostering our customers' sustainability to being a fair and responsible employer.

Iconic references around the globe

Innovation, integration, partnership, and sustainability – are dormakaba's keys to success in access. Innovation, like the digital platforms that enable mobile access, for example in shared workspaces and touch-free solutions for the hospitality industry.

We provide integration that links the earliest planning phase with the daily realities of maintenance and use, sustainably supporting all the customer's activities throughout each building's lifecycle. We offer a partnership that delivers access as an experience, not just a suite of products, meeting the unique needs of each customer.

Taicang Alps Resort (01): The largest comprehensive cultural and tourism project in Taicang's (CN) urban area. dormakaba to install comprehensive access hardware and automated solutions.

Bernapark (04): integrated access in smart city development for a repurposed former papermill including office, residential, shopping and restaurant facilities.

Kempegowda International Airport Bengaluru (07): one of the fastest-growing airports in the world, with the unique distinction of being the first Greenfield Airport in India. dormakaba has supported the airport with self-boarding solutions, automated boarding pass control gates, and electrified door hardware at Terminal 2, which is spread over 255,661 square meters of area.

Think Tomorrow

We are committed to championing sustainability in everything we do, from producing greener access solutions to being a fair and responsible employer and neighbor.

Sustainability is at the core of our vision, which underlines our long-term commitment to shaping a more sustainable industry and future.

In our sustainability framework we focus on three pillars: People, Planet and Partnerships supported by over 30 concrete targets.

People: we empower our people so that they can unlock their full potential

We create a fair, inclusive and safe culture which enables our employees to thrive. We provide a workplace where they can continuously grow, openly contribute with their ideas and feel proud of their achievements.

Planet: we open the doors wide to a low-carbon and circular economy

We develop innovative and resource efficient solutions for the circular economy and do our part to ensure a climate resilient future. We offer durable and energy efficient products that help our customers achieve their own sustainability goals.

Partnerships: we collaborate to promote sustainable development beyond our own doors

We lead by example and engage with our partners to drive more eco-friendly practices and support the protection of human rights. Through our secure access solutions, we also contribute to people's health and safety. We work with partners to raise awareness on safe operating practices of our products.
