Flexible solutions
for urban spaces

AUBRILAM BEGA

urban.bega.com

High-quality outdoor design

The quality of the experience of urban architecture is also influenced by illumination and areas that make people want to stay and spend time in a space. Luminaires and urban furniture for public spaces have to be fit for purpose for many decades to come.

This brochure presents a selection from our complete range of BEGA solutions for designing urban spaces.

Our furniture for public and semi-public spaces transforms open spaces into high-quality places to spend time in.

The exclusive design with unusual components gives urban districts a unique character.

In addition, we can provide you with inspiring insights into the product range from our sister company AUBRILAM. Their decades of expertise guarantee sustainable and durable wood products for outdoor areas. Find inspiration in our extraordinary options for open space design.

The following applies for all products: all our products are manufactured at our sites and fulfil the highest quality standards. The durability, value and the effect in the space will create the perfect look that will last for years to come.

We ensure that our products will last for decades, because we understand the importance of sustainability.

We see this as a journey that never ends, which is why we are constantly developing our products and processes. We never stop researching, looking for the next step, and taking our products to a higher level, in order to find the best possible solution for you.

You can find these products at bega.com and aubrilam.com. Detailed product information can be found by entering the article numbers provided in the search field on the bega.com and aubrilam.com websites.

Ideas, planning, implementation

On the following pages you will find suggestions for furnishing public spaces.

There are three product categories to choose from:

BEGA Modular Furniture, **BEGA Outdoor Furniture** and the **AUBRILAM collections**.

Each of them has its own focus.

BEGA

BEGA Modular Furniture opens up a public space with a robust, modular system that integrates tables, planters and illumination as well as seating elements. The configurator available on our website will help you to visualise your individual ideas.

Tables, benches and stools in various designs are at the centre of **BEGA Outdoor Furniture**. This category also includes furniture for semi-public outdoor areas such as dividing walls, waste bins and planters.

BEGA Sales is your contact for both product lines. You can reach BEGA by contacting our central e-mail address and telephone number

exporte@bega.com · **+49 2373 966-0** · **urban.bega.com**

AUBRILAM

The **AUBRILAM collections** include urban furniture in various designs and material combinations.

AUBRILAM urban furniture is characterised by fresh combinations of materials and high-quality manufacturing. The company focuses on using wood from sustainable sources, creating pieces that are made to last.

Here we present a selection from the complete AUBRILAM range. You can also purchase these products from BEGA.

You can find the entire product range at aubrilam.com.

You can reach AUBRILAM at the central e-mail address

Exceptional quality design elements

When you enter public areas, you want to feel as comfortable as in your own four walls. The quality of our urban furniture creates this feeling – on the way to work, in the park, on the company campus or in your favourite restaurant.

BEGA urban furniture and the AUBRILAM collections enable comprehensive environmental design of the highest quality. This makes them the perfect solution for urban planners, landscape architects, local authorities and municipalities as well as all companies that want to create outdoor recreational areas.

We take care to ensure that all our products are developed and produced with optimal quality and protection of the materials, so our products are attractive and durable. This ensures that your designs will remain impactful and appealing for decades to come.

We have extensive experience with harsh weather conditions and environmental factors, so we are able to produce extremely durable BEGA luminaires. This knowledge also determines how we produce our outdoor furniture. Our pieces are highly functional, perfectly formed and exceptionally sustainable, not least thanks to their durability.

Modular Furniture System

Customised and unique:
modular urban furniture

Public spaces and areas can be complex to design, since their uses can vary greatly. People need to be able to move, interact and relax efficiently. This can be achieved with high-quality furniture that effectively combines function with style. The environment determines the specific requirements that the modular BEGA urban furniture system needs to meet in customised and specific designs.

The flexible BEGA system is the ideal solution for anyone who wants to create a standardised design while taking into account different space and furniture concepts. Get everything you need from a single supplier, and expand your setup at any time, or change the design for a new use – that is how we define sustainable space planning. This means you can use the same furniture for decades, with a consistent quality that is sure to meet the needs of everyone using the space.

Modular Furniture System

The robust solution

Our modules can be combined as needed to create urban furniture for public areas that blends seamlessly into its surroundings. They create a unique ambience anywhere – from historic old towns, to Mediterranean marinas, or in botanical gardens. There are virtually no limits to the design possibilities.

Use our **online configurator** to create design concepts that fulfil the requirements of people and space. You can then share and coordinate your customised plans with others.

Does everything fit? We will take care of it. With our one-stop service, which is also available at any time after project realisation.

build.bega.com

For daily use not just for daylight

Our modular urban furniture features a robust construction made of powder-coated aluminium and high-quality Accoya® wood. The high-quality wood we use comes exclusively from forests managed in an exemplary manner with sustainable forestry. The trees grow back quickly, ensuring constant and sustainable availability. The synthesis of wood and aluminium creates unique accents for the BEGA product portfolio.

To create a pleasant atmosphere at night, individual elements can be supplemented with indirect light. The electrical connection is made via a flexible plug system.

Accoya® wood

See where you are sitting

Recessed luminaires underneath the seat provide an increased feeling of safety at night.

Structure through orientation

Discreet, indirect illumination can identify or emphasise certain areas in the dark.

Ready to go

The modules are connected together on site – the individual elements are very easy to install. The robust construction ensures extremely high dimensional stability.

Polar Oak

Marshland Oak

The high-pressure laminate (HPL) surfaces are available in two colours. They offer high resistance to abrasion, impact, scratches and strong temperature fluctuations.

In combination with the aluminium elements, they are therefore particularly suitable for year-round outdoor use.

Tables, benches and stools from BEGA Outdoor Furniture can be adjusted to uneven surfaces using the integrated levelling system.

Outdoor Furniture

Experience the unique feeling of relaxed togetherness

In semi-public spaces, such as restaurants and leisure centres, furniture is much more than just practical. It also provides structure and atmosphere to the space. Our outdoor furniture creates the ambience your guests expect from social gathering spaces: it brings people closer together. It creates a feeling of connection and a sense of community, or provides private spaces when necessary.

Our outdoor furniture is highly functional, stylish and exceptionally robust. Practical for easy use: the outdoor furniture can be bolted to the foundation on site using an adjustable fastening system.

The high-pressure laminate (HPL) surface is easy to clean and is also extremely environmentally friendly. In addition to a long service life and the many years of use you get from the products, the material can be almost completely thermally recycled.

Sit down – feel well

Spend time sitting outside with friends, enjoying a drink, a snack, and a chat. Round tables with round stools offer an alternative to corners and edges. Their robust design makes them particularly durable.

Our tables are supplied with a central umbrella hole, so that you can integrate shading. This urban furniture can be adapted to uneven surfaces using the integrated levelling system. Matching base plates are available separately for setting up the furniture without mounting.

Attaching and detaching

Bicycles are becoming increasingly important as transport in urban areas. We provide the right bicycle racks for parking bikes. The simple but clear shape makes them perfect in almost any setting.

Vertical surfaces add structure, provide guidance, or close off certain areas. Dividing walls complement our range by providing all these functions.

The privacy screen is available in either "Polar Oak" or "Marshland Oak" decor.

Our dividing walls can be mounted either with an anchorage unit for non-paved surfaces or with a screw-on base for paved surfaces. Thanks to the integrated fastening holes, the bicycle rack can also be mounted on paved surfaces, while an optional anchorage unit is also available as an accessory.

AUBRILAM

RENDEZ-VOUS Collection by AUBRILAM

This AUBRILAM product range features a lounge style and offers a wide range of combination options. The design of this urban furniture consists of horizontally positioned wooden elements, framed by metal bands. In some products, concrete components complement the eye-catching look.

This urban furniture features generous dimensions, so even large outdoor areas can be elegantly designed for relaxation, rest and leisure.

With refined solid wood Accoya® in the colour “Brume”, electrolytically galvanised metal elements that are specially protected against environmental influences, and high-performance concrete filled with organic fibres, the durability and exclusive style of all products is guaranteed.

Rectangular shape – elegant interpretation

For a feel-good atmosphere in parks, in public spaces or on terraces: the AUBRILAM bench from the RENDEZ-VOUS collection comes in the wood colour "Brume". The entire range features minimalistic, functional elements that are ideal for combining. Mounted in rows or groups, they invite you to stay and enjoy the space.

The lounger picks up on the striking rectangular shape of the bench. Arranged together, this urban furniture creates statement seating for cosy places to relax and enjoy the pleasant surroundings.

AUBRILAM

UTYL Collection by AUBRILAM

The urban furniture in the AUBRILAM UTYL product range is functional, aesthetic and durable. The basic concept of this design is all about showcasing the material. The steel is bent and cut – so the cross section of the material remains visible and forms an intentional contrast to the wood colour. This product range owes its unique design to the refined and extremely durable Accoya® solid wood combined with the black-coated steel.

Numerous structural and practical elements complement and complete this furniture collection. Complete designs for squares, paths, parks or building surroundings from a single supplier.

Pause for thought – optimal sitting

These benches will look great in any outdoor area with their eye-catching design.

Optimum ergonomics and maximum comfort make these products pleasant places to spend time. The two three-seater benches with narrow or wide slats provide visual interest – with the same stability.

One or more armrests can be fitted on request.

SKALA

by AUBRILAM

The SKALA collection presents a variety of seating furniture and additions characterised by the combination of warm Accoya® wood with metal structures. Parts of the collection look as if they are growing out of the ground, while other elements stand solidly on the ground. This creates an

organic aesthetic, while emphasising the robustness and stability of the designs. The SKALA collection showcases a perfect fusion of natural materials and contemporary shapes.

NOTCHE

by AUBRILAM

The NOTCHE collection embodies seating furniture with a minimalist design, made from Accoya® wood in warm wood tones. The benches that are mounted on existing low concrete walls are a unique feature. Different forms perfectly complement each other. This transforms a simple concrete wall into a bench. A standalone waste bin completes the range.

The combination of Accoya® wood and concrete creates a harmonious interplay of elegance and robustness. Inviting design meets innovative combinations of materials.
