

LBC Legislative Covered Bond Programme Monthly Investor Report

Calculation Date: 3/31/2026

This report contains information regarding the Cover Pool as of the indicated Calculation Date, relating to the Covered Bonds issued by Laurentian Bank of Canada ("LBC") under its Legislative Covered Bond Programme. The composition of the Cover Pool will change as Loans (and their Related Security) are added and removed from the Cover Pool from time to time and, accordingly, the characteristics and performance of the Loans (and their Related Security) in the Cover Pool will vary over time.

This material is for distribution only under such circumstances as may be permitted by applicable law. This material is published solely for informational purposes and this report does not constitute an invitation or recommendation to invest or otherwise deal in, or an offer to sell or the solicitation of an offer to buy or subscribe for, any security. Reliance should not be placed on the information herein when making any decision to buy, hold or sell any security or for any other purpose.

The information set forth in this report has been obtained from, and is based upon, sources believed by LBC to be accurate, however, LBC makes no representation or warranty, express or implied, in relation to the accuracy, completeness or reliability of the information contained herein. Past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied, is made regarding future performance. LBC assumes no liability for any errors or any reliance you place on the information provided herein.

THESE COVERED BONDS HAVE NOT BEEN APPROVED OR DISAPPROVED BY CANADIAN MORTGAGE HOUSING CORPORATION ("CMHC") NOR HAS CMHC PASSED UPON THE ACCURACY OR ADEQUACY OF THIS DISCLOSURE DOCUMENT. THESE COVERED BONDS ARE NOT INSURED OR GUARANTEED BY CMHC OR THE GOVERNMENT OF CANADA OR ANY OTHER AGENCY THEREOF.

As of the Calculation Date, the Guarantor employs the methodology set out below to determine the indexed valuations for Properties relating to the Loans in the Covered Bond Portfolio (the "Indexation Methodology") for purposes of the Asset Coverage Test, the Amortization Test, the Valuation Calculation and in calculating the value of the covered bond collateral held as Contingent Collateral. To account for subsequent price developments, the Guarantor has chosen to adjust the original market values of the Properties securing the Loans in the Covered Bond Portfolio by using the Teranet - National Bank House Price Index™ available by subscription at www.housepriceindex.ca. LBC does not endorse or accept any responsibility for such site or its content, privacy policy or security standards.

As per the CMHC Guide (June 23, 2017) and pursuant to the definition of Indexation Methodology in the Master Definitions and Construction Agreement, notice of any change in the Indexation Methodology must be provided to CMHC and will be reflected in the then-current Investor Report. Changes to the Indexation Methodology may only be made: (i) upon notice to CMHC and satisfaction of any other conditions specified by CMHC in relation thereto; (ii) if such change constitutes a material change, subject to satisfaction of the Rating Agency Condition; and (iii) if such change is materially prejudicial to the Covered Bondholders, subject to the consent of the Bond Trustee. The Indexation Methodology must at all times comply with the requirements of the CMHC Guide.

The Cover Pool is owned by LBC Covered Bond Guarantor Limited Partnership (Guarantor LP), which has no liabilities or claims outstanding against it other than those relating to the LBC Covered Bond Programme.

In this report, currency amounts are stated in Canadian dollars ("\$"), unless otherwise specified.

Indexation and Valuation Methodologies

The Teranet-National Bank House Price Index™ (the "House Price Index") is an independent representation of the rate of change of Canadian single-family home prices. The measurements are based on the property records of public land registries, where sale price is available. The Teranet-National Bank House Price Index™ Composite 11 (the "Composite 11 House Price Index") is an independently developed representation of monthly average home price changes in the following eleven Canadian metropolitan areas: Victoria, Vancouver, Calgary, Edmonton, Winnipeg, Hamilton, Toronto, Ottawa, Montréal, Québec and Halifax. These metropolitan areas are combined to form the Composite 11 House Price Index, which is the weighted average of these eleven metropolitan areas.

The Indexation Methodology to be employed by the Guarantor will be based on: (a) with respect to Properties located within the cities of Vancouver, Victoria, Calgary, Edmonton, Winnipeg, Ottawa-Gatineau, Hamilton, Toronto, Montreal, Quebec City and Halifax, data provided by Teranet through the House Price Index; and (b) for Properties located in all other areas of Canada, a property value that is adjusted using the Composite 11 House Price Index™, which is calculated as a weighted average of the data for the eleven metropolitan cities included in the House Price Index. The data derived by the House Price Index is based on a repeat sales method, which measures the change in price of certain residential properties within the related area based on at least two sales of each such property over time. Such price change data is then used to formulate the House Price Index for the related area. Details of the House Price Index and the Composite 11 House Price Index may be found at: www.housepriceindex.ca.

A three-step process is used to determine the Market Value for each Property subject to the Related Security in respect of a Loan. First, a code (the Forward Sortation Area (FSA)) which identifies the location of the Property is compared to corresponding codes maintained by Teranet to confirm whether the property is located within any of the 11 Canadian metropolitan areas covered by the Index. Second, to the extent an FSA match is not found, the name of the city in which such Property is located is used to confirm whether such city matches any of the Canadian metropolitan areas covered by the Index. The Market Value is then determined by adjusting the Latest Valuation for such Property, at least quarterly, by the rate of change for the corresponding Canadian metropolitan area, and where there is no corresponding Canadian metropolitan area, the rate of change indicated in the Index, from the date of the Latest Valuation to the date on which the Latest Valuation is being adjusted for purposes of determining the Market Value for such Property. Where the Latest Valuation in respect of such Property pre-dates the first available date for the relevant rate of change in the Index, the first available date for such rate of change is used to determine the rate of change to apply to adjust the Latest Valuation for purposes of determining the Market Value for such Property. Such adjusted Market Value is the adjusted Original Market Value referred to in the Monthly Investor Report.

The Issuer and the Guarantor LP may from time to time determine to use a different index or indices or a different indexation methodology to adjust the Latest Valuation for subsequent price developments to determine Market Value for example, to obtain rates of changes in home prices for metropolitan or geographic areas not covered by the Index, to use an index or indices that the Issuer and Guarantor LP believe will produce better or more reliable results or that is more cost effective.

Risk Factors relating to the Indexation Methodology

The Issuer and the Guarantor LP believe that the following factors, although not exhaustive, could be material for the purpose of assessing risks associated with the use of the Index.

No recourse for errors in the data in the Index

The Issuer and the Guarantor LP have received written permission from the Index providers to use the Index. The data in the Index is provided on an "as is" basis and without any warranty as to the accuracy, completeness, non-infringement, originality, timeliness or any other characteristic of the data and the Index providers disclaim any and all liability with respect to such data. Neither the Issuer nor the Guarantor LP makes any representation or warranty, express or implied, in relation to the accuracy, completeness or reliability of such information or assumes any liability for any errors or reliance placed on such information. As a result, there will not be any recourse for investors, the Issuer or the Guarantor LP for any errors in the data in the Index relied upon to determine the Market Value in respect of any Property subject to the Related Security in respect of a Loan.

The actual rate of change in the value of a Property may differ from the rate of change used to adjust the Latest Valuation for such Property in determining its Market Value

The Index does not include a representation of changes in average home prices outside of the Canadian metropolitan areas that it covers and was developed as a representation of monthly average home price changes in the Canadian metropolitan areas that it does cover. While the Index uses data from single family properties, including detached, semi-detached, townhouse/row homes and condominium properties, it is being used to determine the Market Value of all Properties included as Related Security for Loans in the Covered Bond Portfolio, which may not correspond in every case to the categories included in the Index. The actual value of a Property subject to the Related Security in respect of each Loan may change at a rate that is greater than or less than the rate of change used to determine the Market Value for such Property. This discrepancy may be magnified when the Index is used to determine the Market Value for a Property outside of the Canadian metropolitan areas covered by the Index given factors that affect housing prices may vary significantly regionally from a national average or where the Index is used to determine Market Value for a Property in a category not covered by the Index and whose value is affected by factors that are different from

LBC Legislative Covered Bond Programme Monthly Investor Report

Calculation Date: 3/31/2026

those that affect the value of properties in the categories used by the Index. In addition, the methodology applied to produce the Index makes certain fundamental assumptions that impose difficulties in selecting or filtering the properties that are used to produce the Index due to a lack of information about the properties, which may result in such properties being excluded and may impact the accuracy of the representation of the rate of change in the Index.

The Index may not always be available in its current form or a different Index may be used to determine Market Value for a Property subject to Related Security in respect of a Loan

The Index providers may make a change to the method used to calculate the Index, the frequency with which the Index is published may change (such that the Index no longer meets the requirements in the Guide), or the Index may cease to be available to the Issuer and the Guarantor LP for determining the Market Value of the Property subject to Related Security in respect of a Loan. In such circumstances, the Issuer and the Guarantor LP may or will need to select one or more new indices for determining Market Value of the Property subject to Related Security in respect of a Loan. The Issuer and the Guarantor LP may also determine at any time to use a different index or indices to adjust the Latest Valuation of the Property subject to Related Security in respect of a Loan for subsequent price developments to determine the Market Value of such Property, for example, to obtain rates of changes in home prices for metropolitan or geographic areas not covered by the Index, to use an index or indices that the Issuer and Guarantor LP believe will produce better or more reliable Market Value results or that is more cost effective. The use of any such new indices to adjust Latest Valuation could result in a significant change in the Market Value of the real property subject to the Related Security in respect of each Loan. See "Housing Price Index Methodology - Indexation Methodology".

Market Risk

Refer to the Risk Factors section of the Offering Memorandum dated April 7, 2022 (p. 11-12).

Interest Rate Swap Agreement.

To provide the Guarantor with a hedge against possible variances in the rates of interest payable on the Portfolio Assets (which may, for instance, include variable rates of interest or fixed rates of interest) and the interest amounts payable under the Intercompany Loan and, following the Covered Bond Guarantee Activation Event, the Covered Bond Swap Agreement, the Guarantor has entered into the Interest Rate Swap Agreement with the Royal Bank of Canada as Interest Rate Swap Provider. The Interest Rate Swap Agreement is effective and cashflows are required to be exchanged in accordance with the fixed and floating interest rate swap confirmations entered pursuant thereto. The Interest Rate Swap Provider may be required to post collateral to secure its obligations under the Interest Rate Swap Agreement upon activation of rating triggers. The Guarantor has established the Yield Supplement Fund to be utilized by the Guarantor to make payments under the Interest Rate Swap Agreement.

Rating Triggers: Part 5. Other Provisions (j) Additional termination provisions of the ISDA Schedule to the Interest Rate 2002 Master Agreement (p. 40-42).

Amended and restated fixed and floating swap confirmations:

Amended and Restated Interest Rate Swap Confirmation – Fixed Rate

Amended and Restated Interest Rate Swap Confirmation – Floating Rate

For more information, please refer to the Interest Rate Swap Agreement section of the Offering Memorandum dated April 7, 2022 (p. 172-175).

Covered Bond Swap Agreements.

To provide a hedge against interest rate [and other] risk, (i) to the Issuer prior to the occurrence of a Covered Bond Guarantee Activation Event, in respect of amounts payable in respect of obligations of the Issuer under the Covered Bonds and (ii) to the Guarantor following the occurrence of the Covered Bond Guarantee Activation Event, in respect of amounts payable in respect of obligations of the Guarantor under the Covered Bond Guarantee, the Issuer has entered into an Issuer Swap Transaction in respect of each Series of Covered Bonds with the Royal Bank of Canada as Covered Bond Swap Provider. Pursuant to Novation Agreements between the Issuer, the Covered Bond Swap Provider and the Guarantor, the Issuer Swap Transactions will automatically be novated by the Issuer to the Guarantor upon occurrence of a Covered Bond Guarantee Activation Event. The Issuer Swap Transactions are effective and cashflows are required to be exchanged by the Issuer and Covered Bond Swap Provider in accordance with the Covered Bond Swap Confirmations. The Covered Bond Swap Provider may be required to post collateral to secure its obligations under the Covered Bond Swap Agreements upon activation of rating triggers.
