We are looking for you who want to try new things within Dynamics 365 and do stuff differently

We are looking for curious and driven individuals to our Dynamics team. At Cypoint we believe in the power of the self and really want you to feel at home when working with us. Our mindset is open and tolerant - a no brainer if you, like us, believe that diversity and difference is the bedrock of great work dynamics. We are currently staffing up with teams within different areas of expertise, to facilitate and provide our customers with value-creating processes throughout the partnership.

Consulting role: Finance/Accounting
Examples of areas within the scope are shared services and advanced budgeting and reporting.

Consulting role: Application Management
Continuously developing, handling and upgrading of the D365 platform. Examples of areas within the scope are regression testing, upgrading, unit testing, handling of ISV solutions, ensuring performance and handling of integrations.

Consulting role: Logistics/Retail

Examples of areas within the scope are continuously developing of logistical processes, pallet stock , main warehouse, multiple plicking and transport planning.

As a senior consultant within Dynamics, you will have a managing role in the implementation of the service at our customer's, with a logistical focus.

This is what we know about you already

- Higher education (masters degree in business administration and economics) or dito within work experience
- Consulting experience within Finance (Accounting/Controlling)
- Experience of Dynamics 365 For Finance & Operations (AX)
- Experience of large project implementation
- Eager to contribute to building the best competence within the area
- Certificates within Dynamics are meriting

Primary location: mostly Stockholm

Work status: full-time
