

Booking.com

How Booking.com are tackling unparalleled growth, complexity, and scale with Elastic

“It's been a collaborative effort of building new solutions upon the technology and the innovation that is happening within Elastic. And being able to grow fast is where Elastic cloud has been a key part of the offering we trying to build.”

– David Ponessa, Senior Site Reliability Engineer

PROFILE

About: Booking.com, headquartered in Amsterdam, is one of the worlds largest online travel agencies.

Industry: Travel / Digital Native

Location: Netherlands

GOALS

- Manage growth effectively
- Reduce risk, fraud, and chances for brand damage
- A compliant environment with minimized operational overheads

SOLUTIONS

- Deployed **Elastic Security** for reliable, scalable solutions that could be implemented seamlessly
- Leveraging **Elasticsearch** and for fast data accessibility and visualization with Kibana
- Deployed on **Elastic Cloud** to support growth and scalability

RESULTS

- Reliably supported business growth and security coverage by reducing long term backlog by 89% for security operations teams
- Scaled seamlessly from 35 TB to 125 TB per day
- Increased performance without increasing resources
