

# Welcome to our July monthly newsletter.

## In this edition:

- **Webinar: Arctic Virtual Reality**
- **Our Network's New Website**
- **Opportunity to Share Your Work**

### Wesley Della Volla wants to change how we experience our world.

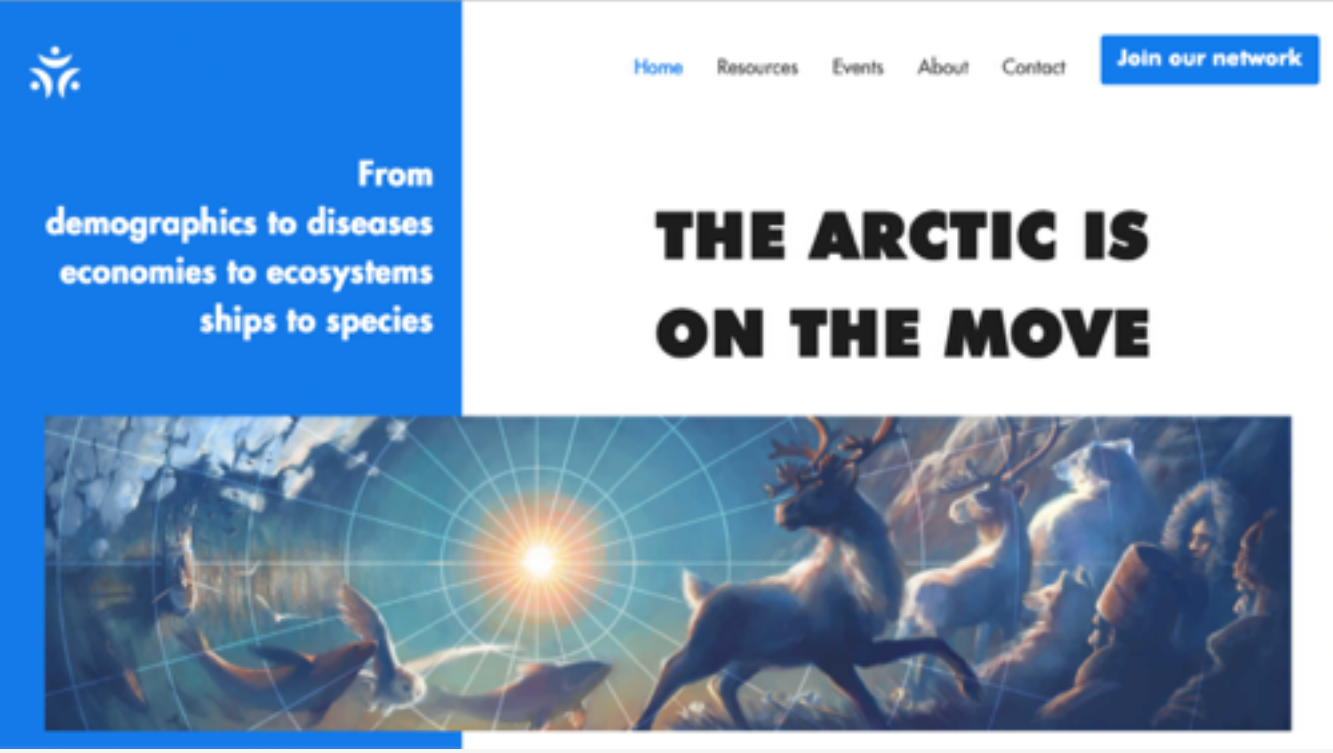

An Emmy and Webby award-winning immersive technology pioneer, Wesley has brought audiences to Everest, the Amazon, and even the Moon. “Virtual reality can open the world to those limited by resources, access, and most important health and physicality.” Wesley’s mission in life is to create dialogue that could change lives. He knows it sounds hyperbolic, but Wesley wants to leave the world better than he found it. And we do too.

[Join our webinar on Wednesday August 12](#) to learn how virtual reality and immersive learning can build empathy, connection, & commitment to conservation in Arctic research. Wesley will present ways you can use shared, synchronized immersive reality for your presentations. Create immersive experiences out of your Arctic science research by using devices you already have. Don't miss this opportunity to learn how you can bring your work to anyone, anywhere.

Free Event Registration

### Visit the new Migration in Harmony Website!

**Our interview with Wesley Della Volla and his virtual reality webinar are just two of dozens of free resources featured on our [new website](#)!** The Migration in Harmony website is teeming with videos, infographics, webinars, and community forums for you to explore.

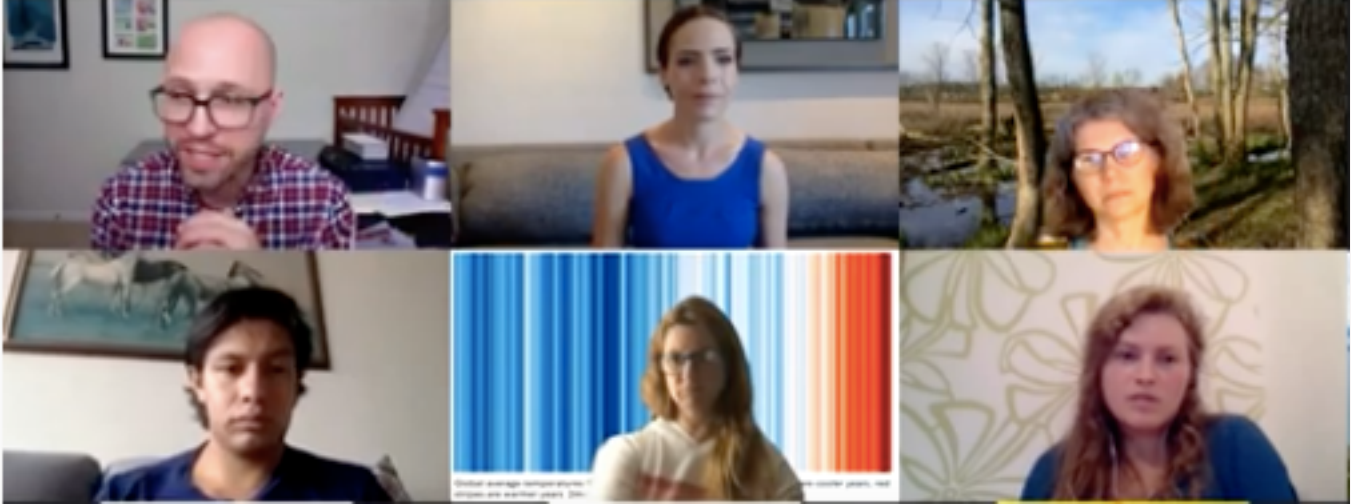

Check out our three-year plan and get to know the MiH-RCN Steering Committee on our [About Page](#). On our [Resource Page](#), you can watch recordings of past webinars on Arctic disasters, science storytelling, and coalition building, and learn from illustrated notes that synthesize information and highlight their most important points.

### Share Your Work With MiH-RCN

The Migration in Harmony Research Coordination Network is home to over 420 members across six continents. The resources and events shared on our new website are just the beginning. We’re committed to showcasing each of you in network webinars, multimedia publications, and monthly newsletters. Member spotlights are an opportunity to communicate your knowledge, research, and experiences to a global audience. It’s also a chance to connect with new collaborators and build meaningful relationships across disciplines.

The MiH-RCN aims to facilitate open communication, foster cross-disciplinary exchange, and build an inclusive community -- and we can't do that without you. We're so excited to share your story, learn about your work, and create solutions to an Arctic in motion together. To share your work, fill out this short form:

Share Your Work with MiH-RCN

With gratitude,

Victoria Herrmann PhD
