

# SAY YES TO SUMMER!

## Build your own Summer Fun Games torch

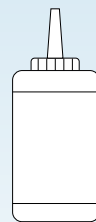

In the spirit of the games, use this activity sheet to build your very own torch!

Once you've built it, why not host your own opening ceremony and let the games commence!

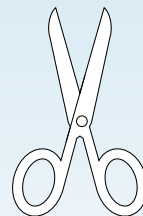

### What you'll need:

A kitchen roll

Glue

Scissors

### How to build your torch:

1. Cut out the base and flames on the right
2. Draw your country's flag (or make up your own) on the blank space on the base
3. Wrap the red flames around your kitchen roll, glueing (or taping) around the bottom
4. Repeat for the orange and yellow flames - you can even add more if you like
5. Wrap the base around the bottom of the flames
6. You could even paint, paper maché, or wrap your handle in tin-foil for a shiny metal feel

It's what we do
