

Water Procurement

Water Procurement from Co-op Power is the simple, easy way to manage, monitor and control your water consumption. By consolidating your existing supplier accounts into a single account, we can improve customer service, simplify bills and take away the admin associated with managing multiple utility suppliers. More importantly, this can help your business to reduce costs.

Your challenge

Your business will probably have numerous sites across multiple regions, supplied by several different water providers. The admin required to manage the invoices, paperwork, and time needed to evaluate each of these suppliers' data is probably proving to be time-consuming and costly. And of course, there's the need to reduce your water consumption and expenditure.

You may understand the need to consolidate or switch water providers but may be daunted by the prospect of doing so without knowing the impact it could have on supply, cost, environmental impact and admin. Water Procurement from Co-op Power will streamline all your suppliers into one easy to manage account with a single point of contact.

Our solution

Choose Co-op Power for Water Procurement, and we can consolidate all your existing water supplier's documentation, billing and points of contact into one easy to manage account. We'll provide you with a monthly report detailing your consumption and outgoings and give you transparent access to the very latest data, expertise and advice to help you to make informed decisions.

Alternatively, if you choose to move your entire water supply to Co-op Power, not only will you receive the same expertise, but you could also benefit from a better price overall. Plus, you'll have one dedicated point of contact for both water and any additional Co-op Power services you currently use. We will manage the entire switching process to ensure a smooth transition of your water supply.

Save time

Improve data insight

Single point of contact

Centralised payment

Reduced costs

It's what we do

The Co-op Power difference:

Dedicated account manager

Whether you're consolidating your existing suppliers into one account or switching your entire supply to Co-op Power, you will benefit from a dedicated account manager who will be your go-to expert for all account and supply queries. If you already use Co-op Power products or services, all your accounts will be managed by one individual, ensuring consistency and understanding of your business's requirements.

Centralised payment

No matter how many water providers you currently use or invoices you receive, we will streamline them all into one easy to manage account. Not only will this save you large amounts of admin, but it will also give you a clearer picture of your expenditure and if any action is required, e.g. switching supplier or alerting a supplier to a potential problem.

Proven expertise

We have been an industry leader in the green energy market since we were established to procure ethically sourced green electricity for the Co-op back in 2003. Since then, we have diversified into all areas of green energy, providing our members with sustainable energy, affordable pricing, unrivalled industry expertise and know-how.

How we've helped others:

“ The initial quote from our existing supplier felt competitive. It wasn't until we had discussions with Co-op Power we realised we were paying too much. **Co-op Power beat our original quote by 13% saving us over £140,000.** ”

Mike Jackson
Director of Supply Chain Management
and Head of Charity, Roadchef

£140,000 saved

Beating the original quote by 13%

Why choose Co-op Power?

Co-op Power is one of the largest energy buying groups in the UK, and thanks to our members, we have over £200m buying power per year, making us the largest co-operative energy buying group in the country. Yet, we don't do what we do for money. We do it because we want to leave the world in a better place for future generations and by joining Co-op Power, you'll help us do just that.
