we care about you

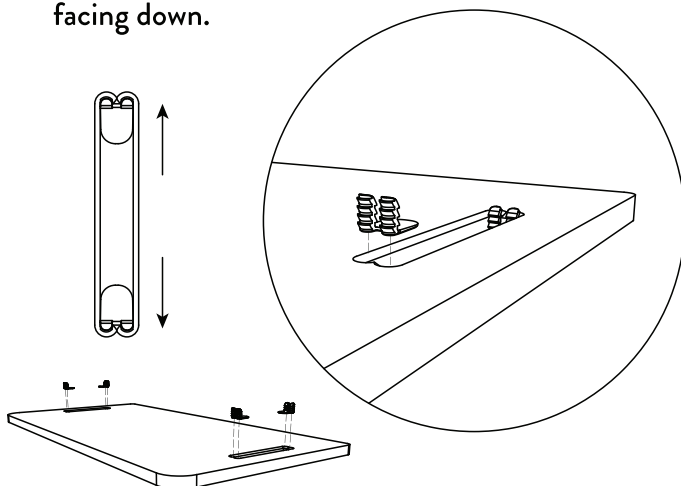

To protect your worldly possessions, and those around you, we recommend securing the top panel of your unit using the kit provided in here.

Installing the parts in this pack alongside the wall mounting anchors provided with the bookshelf, will make sure you, your loved ones, and loved things will be safe and secure.

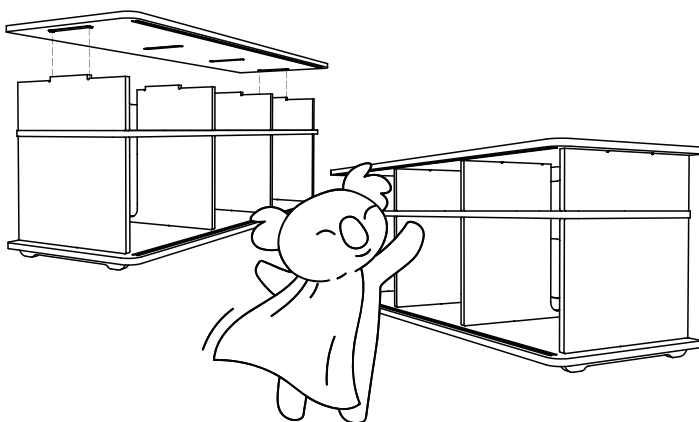

This kit includes 5 x Safety Clips (one's a spare).

1. Turn the top panel of your unit upside down.
2. Press the four clips in place, with the flat section facing down.

3. Turn the panel and align the slots with the top of the vertical panels of your unit.

4. Apply gentle force to press the top panel in place.
Enjoy!
