Drug Quantity Limits

Prioritizing Safety

New medications and drug information arrive to the market at a quick pace. Additionally, a large number of drugs have been removed from the market because of safety issues identified after marketing (drug recalls). To assure our members have access to safe and effective drug therapy and to protect against inappropriate use and waste, the Rightway drug utilization program requires quantity limits on selected prescription medications.

Through extensive research, Rightway has identified and implemented additional coverage requirements or limits on select medications. These requirements ensure our members use these drugs in the safest, most effective way. A team of doctors and pharmacists developed these requirements and limits for our plan to help us provide quality coverage for our members.

Requesting an Exception

For patients who require higher doses for medical purposes, an exception process is in place. Work with your doctor to complete the exception process demonstrating that you meet medical necessity criteria.

For assistance you can also reach out and chat with a clinical pharmacist through the RightwayRx App available on the Apple App Store[®] and Google Play[™] store.
