Cloud Transformation Enabled by TrueProject

Predict project problems before you know you have them

Streamline your journey to the cloud with our cloud transformation, offering expert guidance and support every step of the way.
Success Story

Expanding possibilities: Our proven track record of success

Project governance for better productivity

Client: Multinational Telecommunications Conglomerate Analyzed vast amounts of project data, utilizing advanced analytics to identify patterns and potential risk factors that could lead to overruns and delays.

By adopting Cloud Transformation, they were made aware of massive potential losses and were able to demonstrate how they could boost productivity by 12 percent, which can yield an improvement in project realization by millions of dollars over 36-months.

- -

Project oversight and management to ensure on-time delivery

The client needed a system that could mitigate project issues or failures and differentiate them competitively.

Adopting Cloud Transformation enabled the organization to enhance governance, oversight, and project insight across its client projects, ensuring on-time and on-budget delivery while meeting project needs.

Key offerings

- Project audits and quality checks
- Project steering and control
- Resource coordination, coaching, and operation support

Our approach

- **Project risk identification** – Exactly what executives need to avoid surprises and 'status spin'
- **Best practice enforcement** – Predictive analytics developed by industry experts
- **Drilldown dashboard visualization** – See week-to-week KPIs, incorporating forward-looking human feedback with backward-looking project performance
- **Built-in governance**

Benefits

- Cost control and transparent reporting
- Insights beyond traditional systems, a strategic game-changer for executives
- Project management predicts problems early on, saving up to 30 percent costs
- Proactive approach helps predict risk and engages the right stakeholders to mitigate or remove the risk
