Next-Gen POS Solutions

Product engineering, implementation, and managed services for POS

Our advanced point-of-sale (POS) solutions are designed to address each client's unique needs. With expertise across diverse industries, we deliver seamless integration, elevate customer experiences, and ensure top-tier data security.

Solution Features

- POS development and modernization
- POS QA and test automation
- POS implementation and rollouts
- Accelerators and GenAI solutions
- POS managed services

Services Offered

- Advisory and consulting
- Enterprise architecture services
- Design, configuration, lab setup, and testing
- Accelerators and gen AI solutions
- Data migration and API integrations, including payments
- 24x7 managed services and QA support

Benefits

Enhanced user experience

Lower cost of operations

Faster global rollouts

Seamless operations

Success Stories

Expanding possibilities: Our proven track record

Implemented a next-gen cloud POS platform for a leading retail platform and products provider, transforming POS into an e-commerce engine with offline resiliency. Achieved **25%-55% cost savings, enabled cash register setup in minutes, and accelerated implementation by 25%-50%,** ensuring faster updates for seamless operations.

Implemented a **POS solution** for an **American retailer,** ensuring a **seamless omnichannel experience** for customers. We enhanced **regression and release cycles** with **QE automation**, enabling faster updates and smoother operations.

Implemented **customized POS integration** for an **upscale home-furnishings retailer,** enabling **centralized access to sale and return transactions via XADMIN, streamlining daily reconciliation,** automating **weekly tax data comparisons**, and eliminating manual validation efforts.
A **Pune-based lab** for seamless operations handles support and customization.

Implemented a **modernized checkout process** and **seamless POS integration** for a **large US department store chain,** ensuring a **smooth omnichannel experience.** We enhanced **regression speed with QE automation,** enabled **early issue detection via pipeline-integrated regressions,** and leveraged an **offshore POS lab for testing and development.**
