

JuiceBot

# Machine Meets Garden

# Enter: The modern way to juice

At JuiceBot, our goal is to make freshly made, truly organic smoothies and juices as accessible and easy as finding a soda machine.

# Pick Your Juice Like You Pick Your Playlist

With our unique customization model, we've put all the juice power in your hands. We'll deliver the freshest ingredients to our JuiceBot kiosk—all you have to do is pick and sip.

Simple, right?

## Citrus

Orange, Lemon,  
Pineapple,  
Cayenne

## Red

Orange, Beets,  
Lime, Ginger

## Green

Cucumber, Cilantro,  
Spinach, Kale

## Smoothie

Almonds, Coconut  
Water, Coco Meat

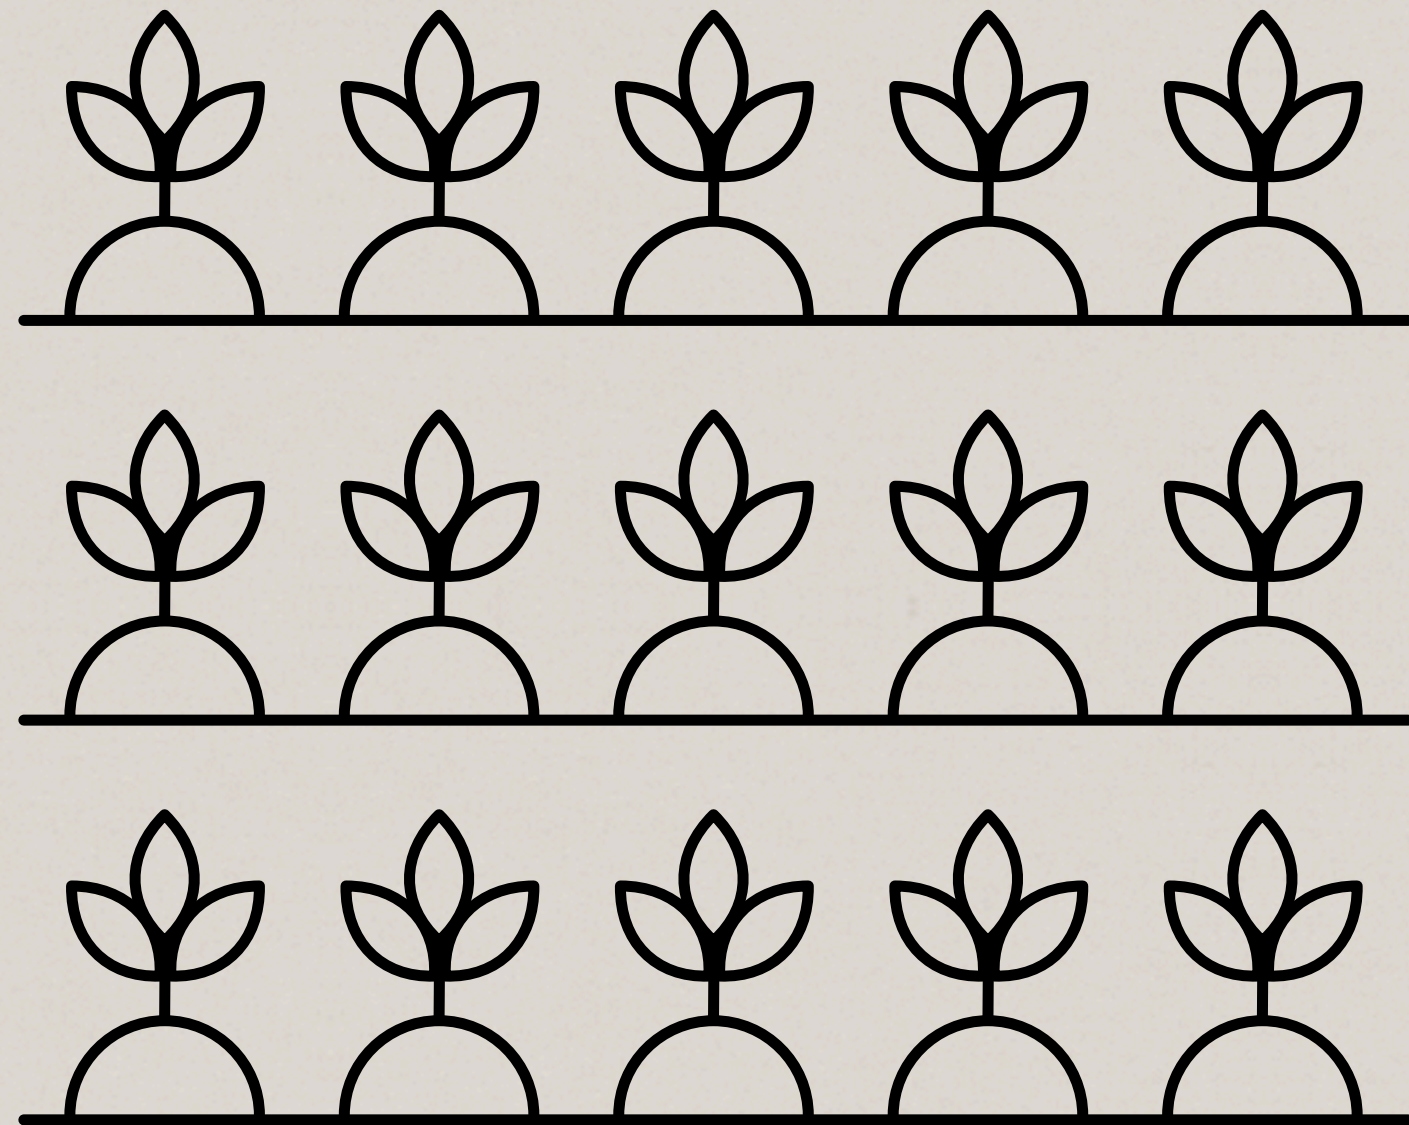

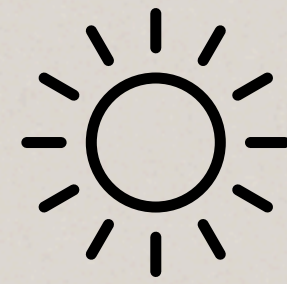

# How It Works

Every drop of juice or smoothie you get from a JuiceBot is created within 48 hours of being placed inside our kiosk. High-tech stainless steel containers protect the juice and smoothies from light and heat oxidation to combine freshness, customization, and convenience like never before.

# The Process

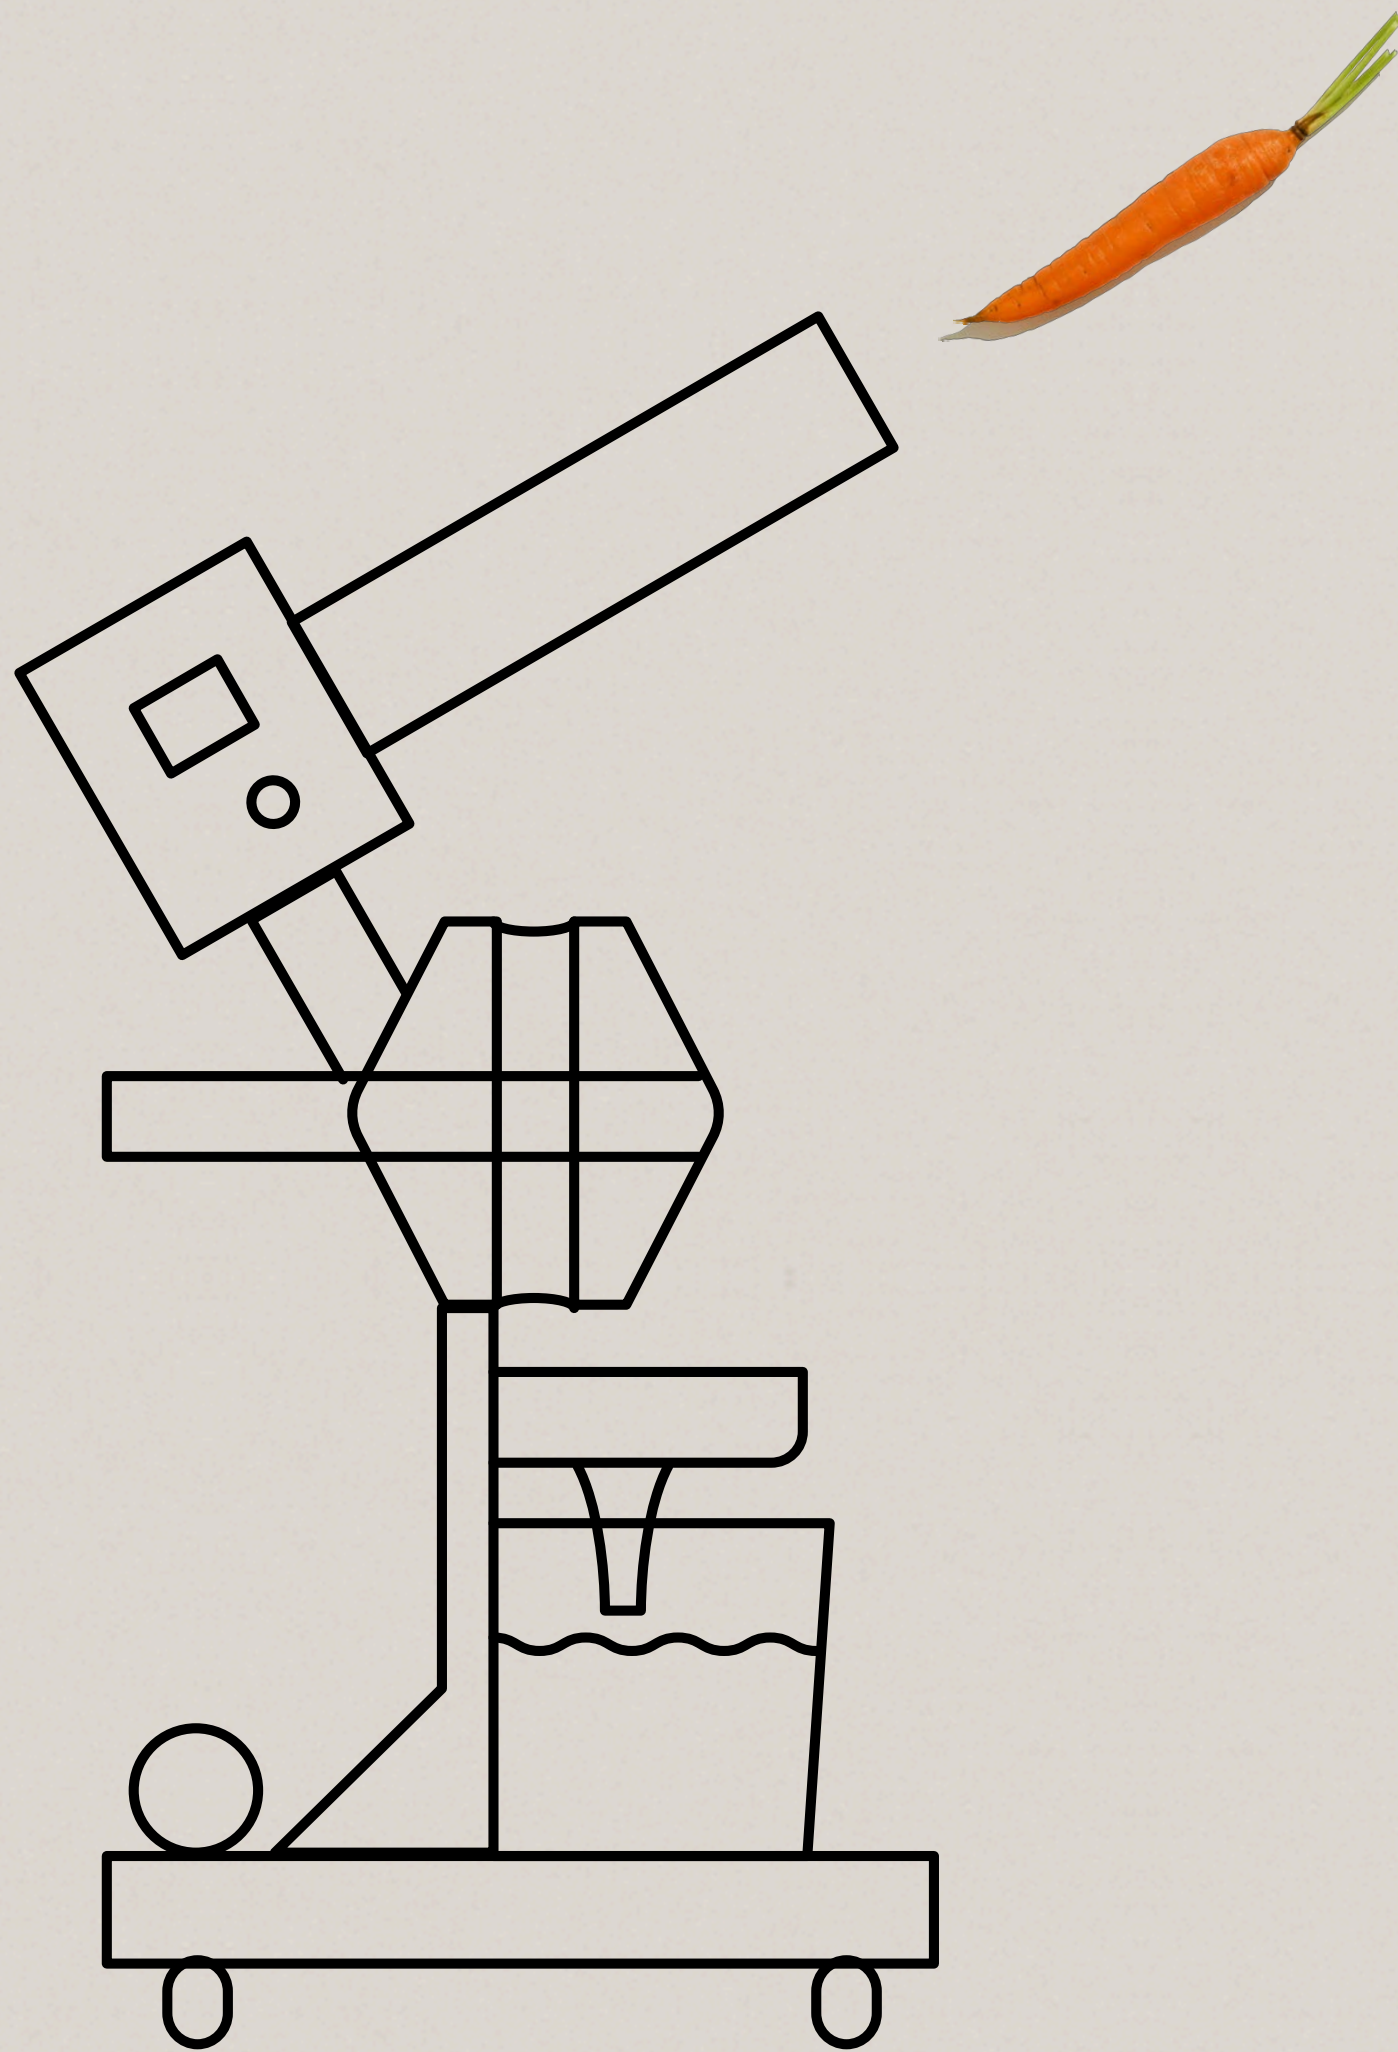

## Farm

100% Organic. 100% Local. 100% Delicious. We make sure that everything from the growing process to the handling process keeps the fruits and veggies in their truest form. It's like farm to table, but to be honest we thought farm to bot sounded cooler.

# The Process

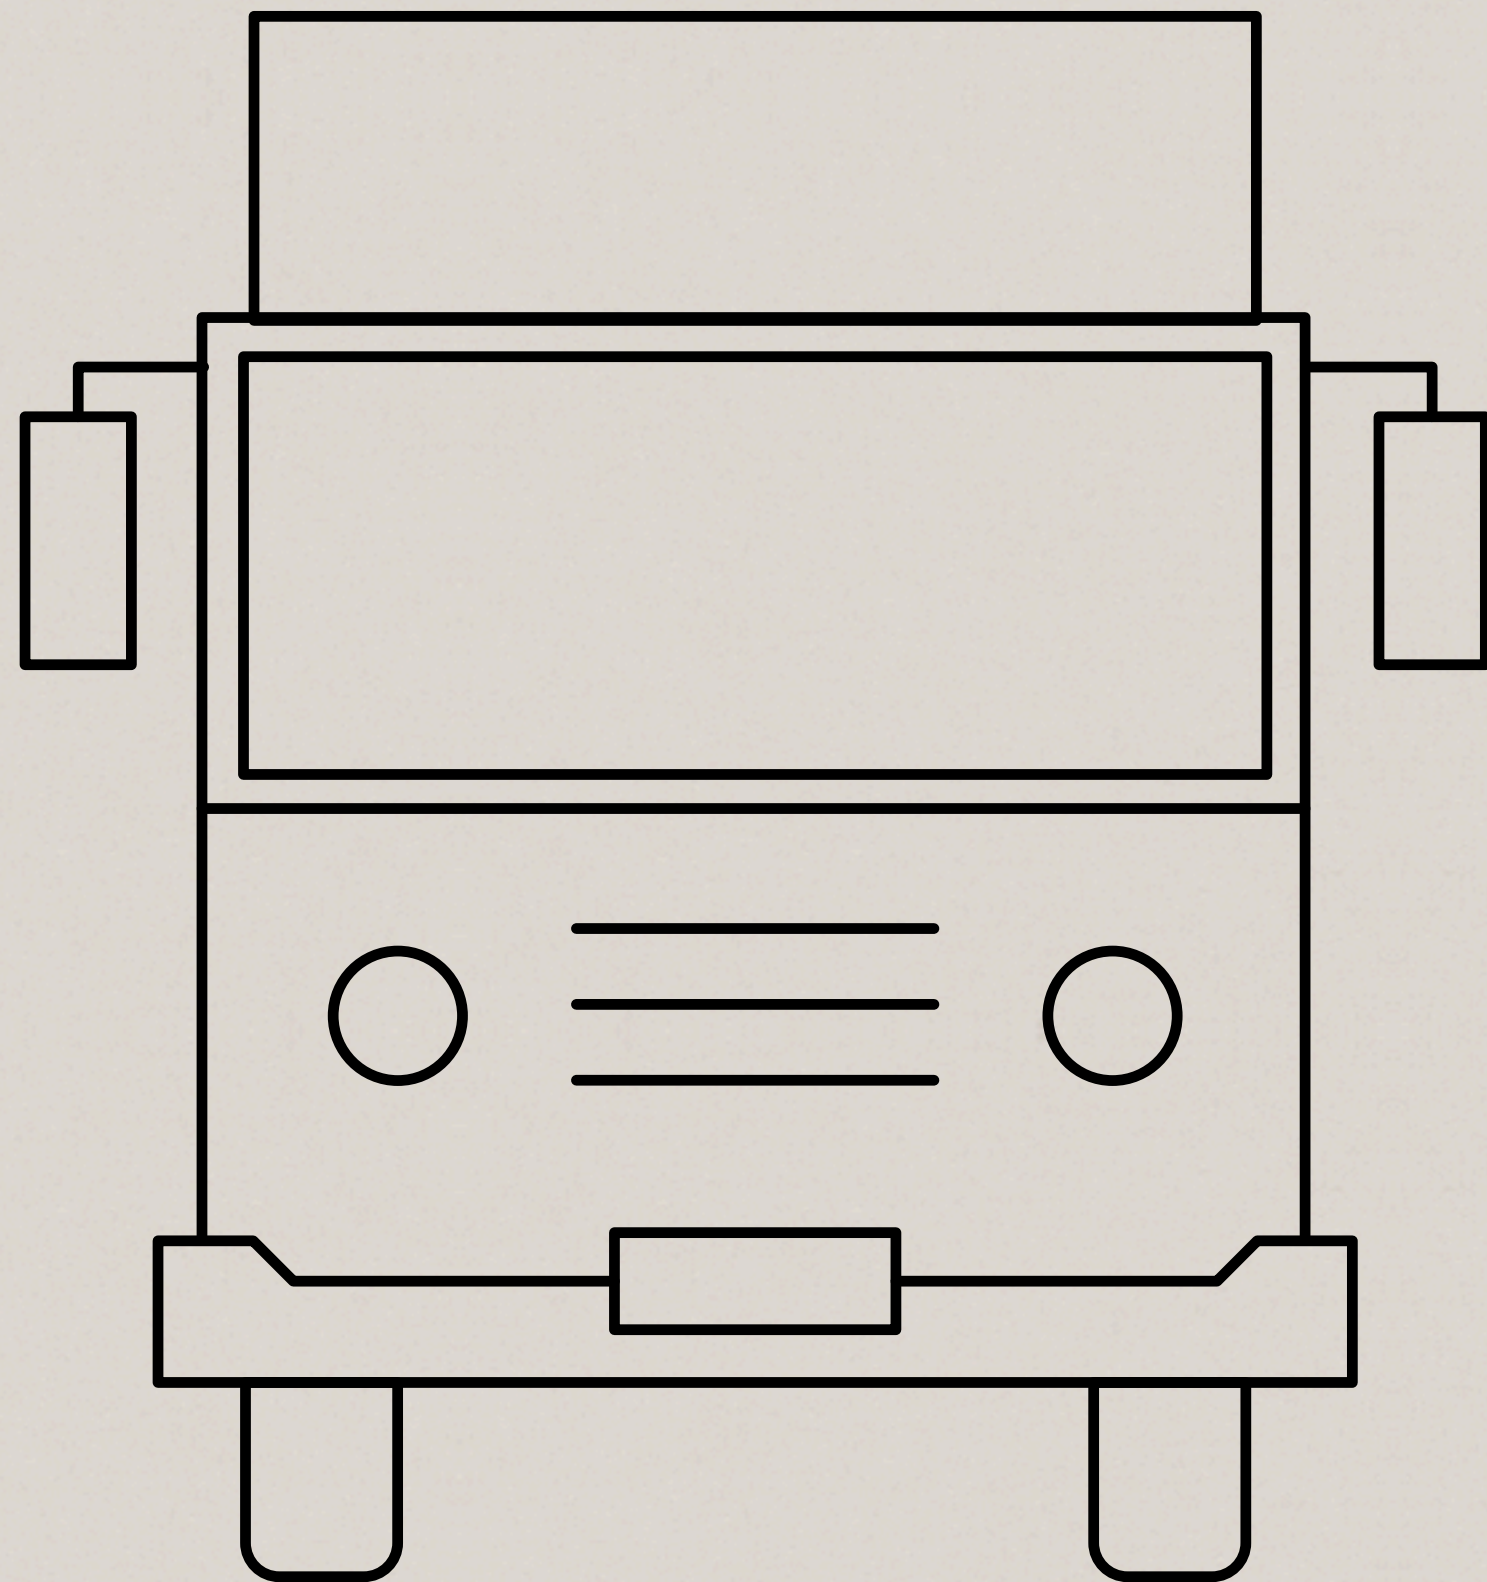

## Commissary Kitchen

Once the organic produce reaches our commercial kitchen from the farm, we wash, prep, and test for pertinent pathogens like Salmonella and Listeria to keep the juice fresh, safe, and bot-ready!

# The Process

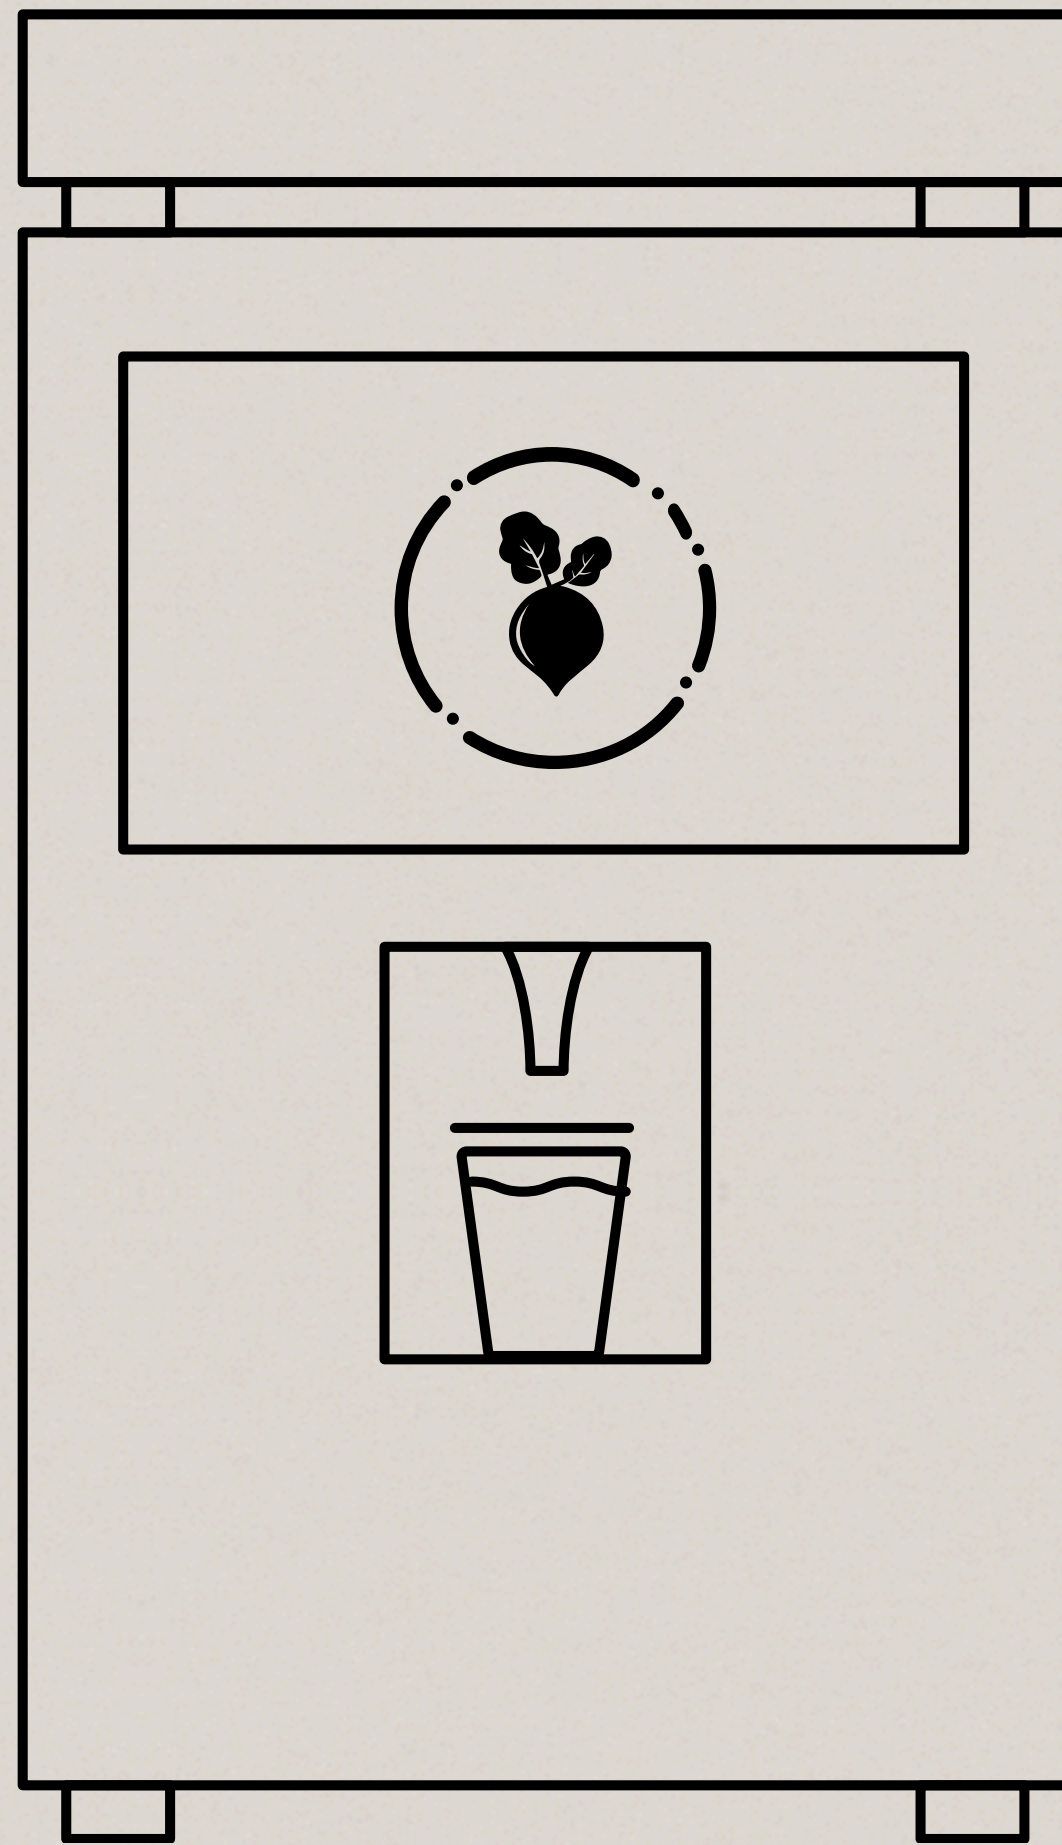

## Delivery

All products from the JuiceBot Commissary Kitchen are transported in 304L food-grade stainless steel containers, inside refrigerated vans, where they protect produce from light and heat oxidation on their way to your JuiceBot kiosk

# The Process

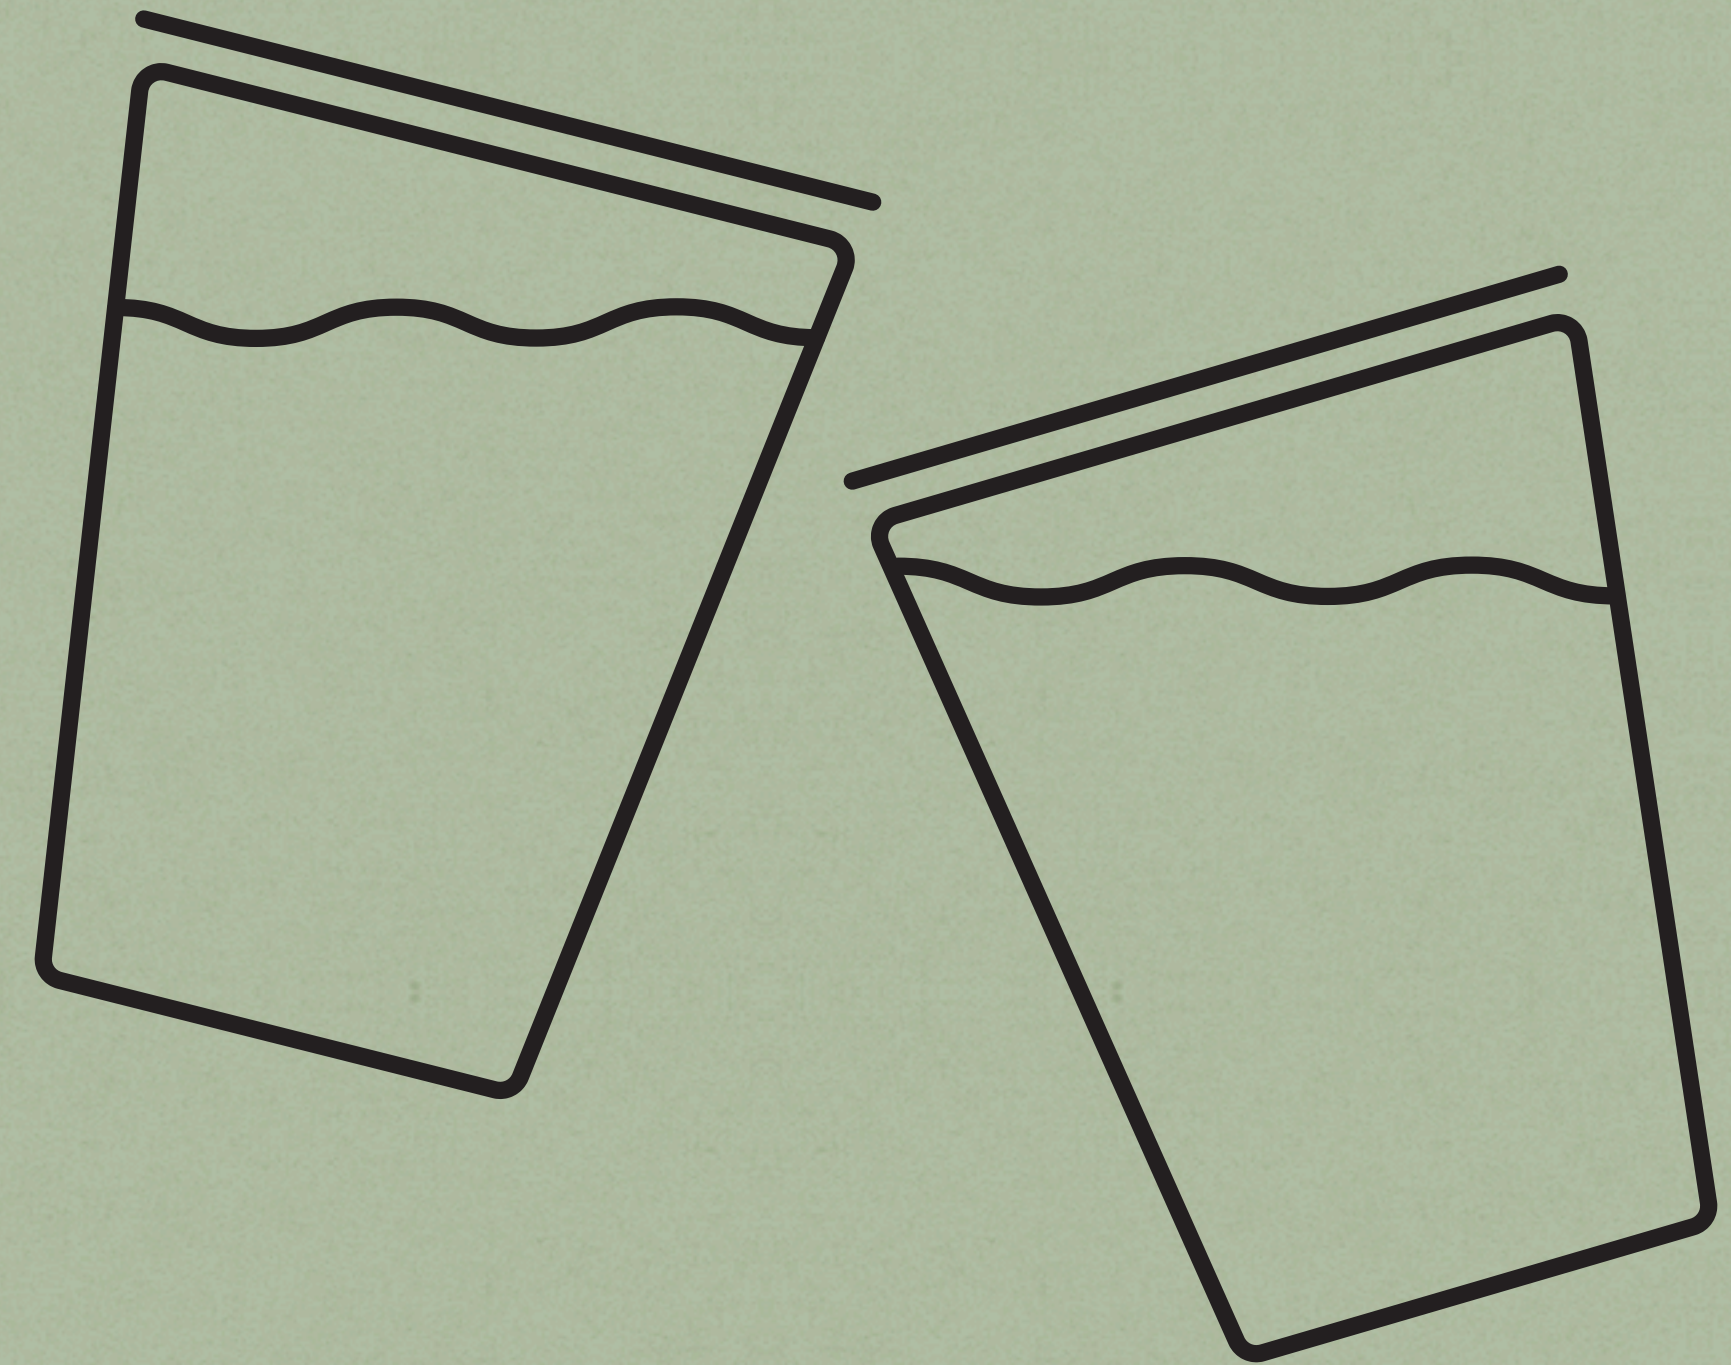

## Juice Time

Customize your mix of fruit and veggie blends or get started with one of our four favorite juice combos. Then the bot gets to work, filling our plant-based cups with fresh juice and major organic vibes.

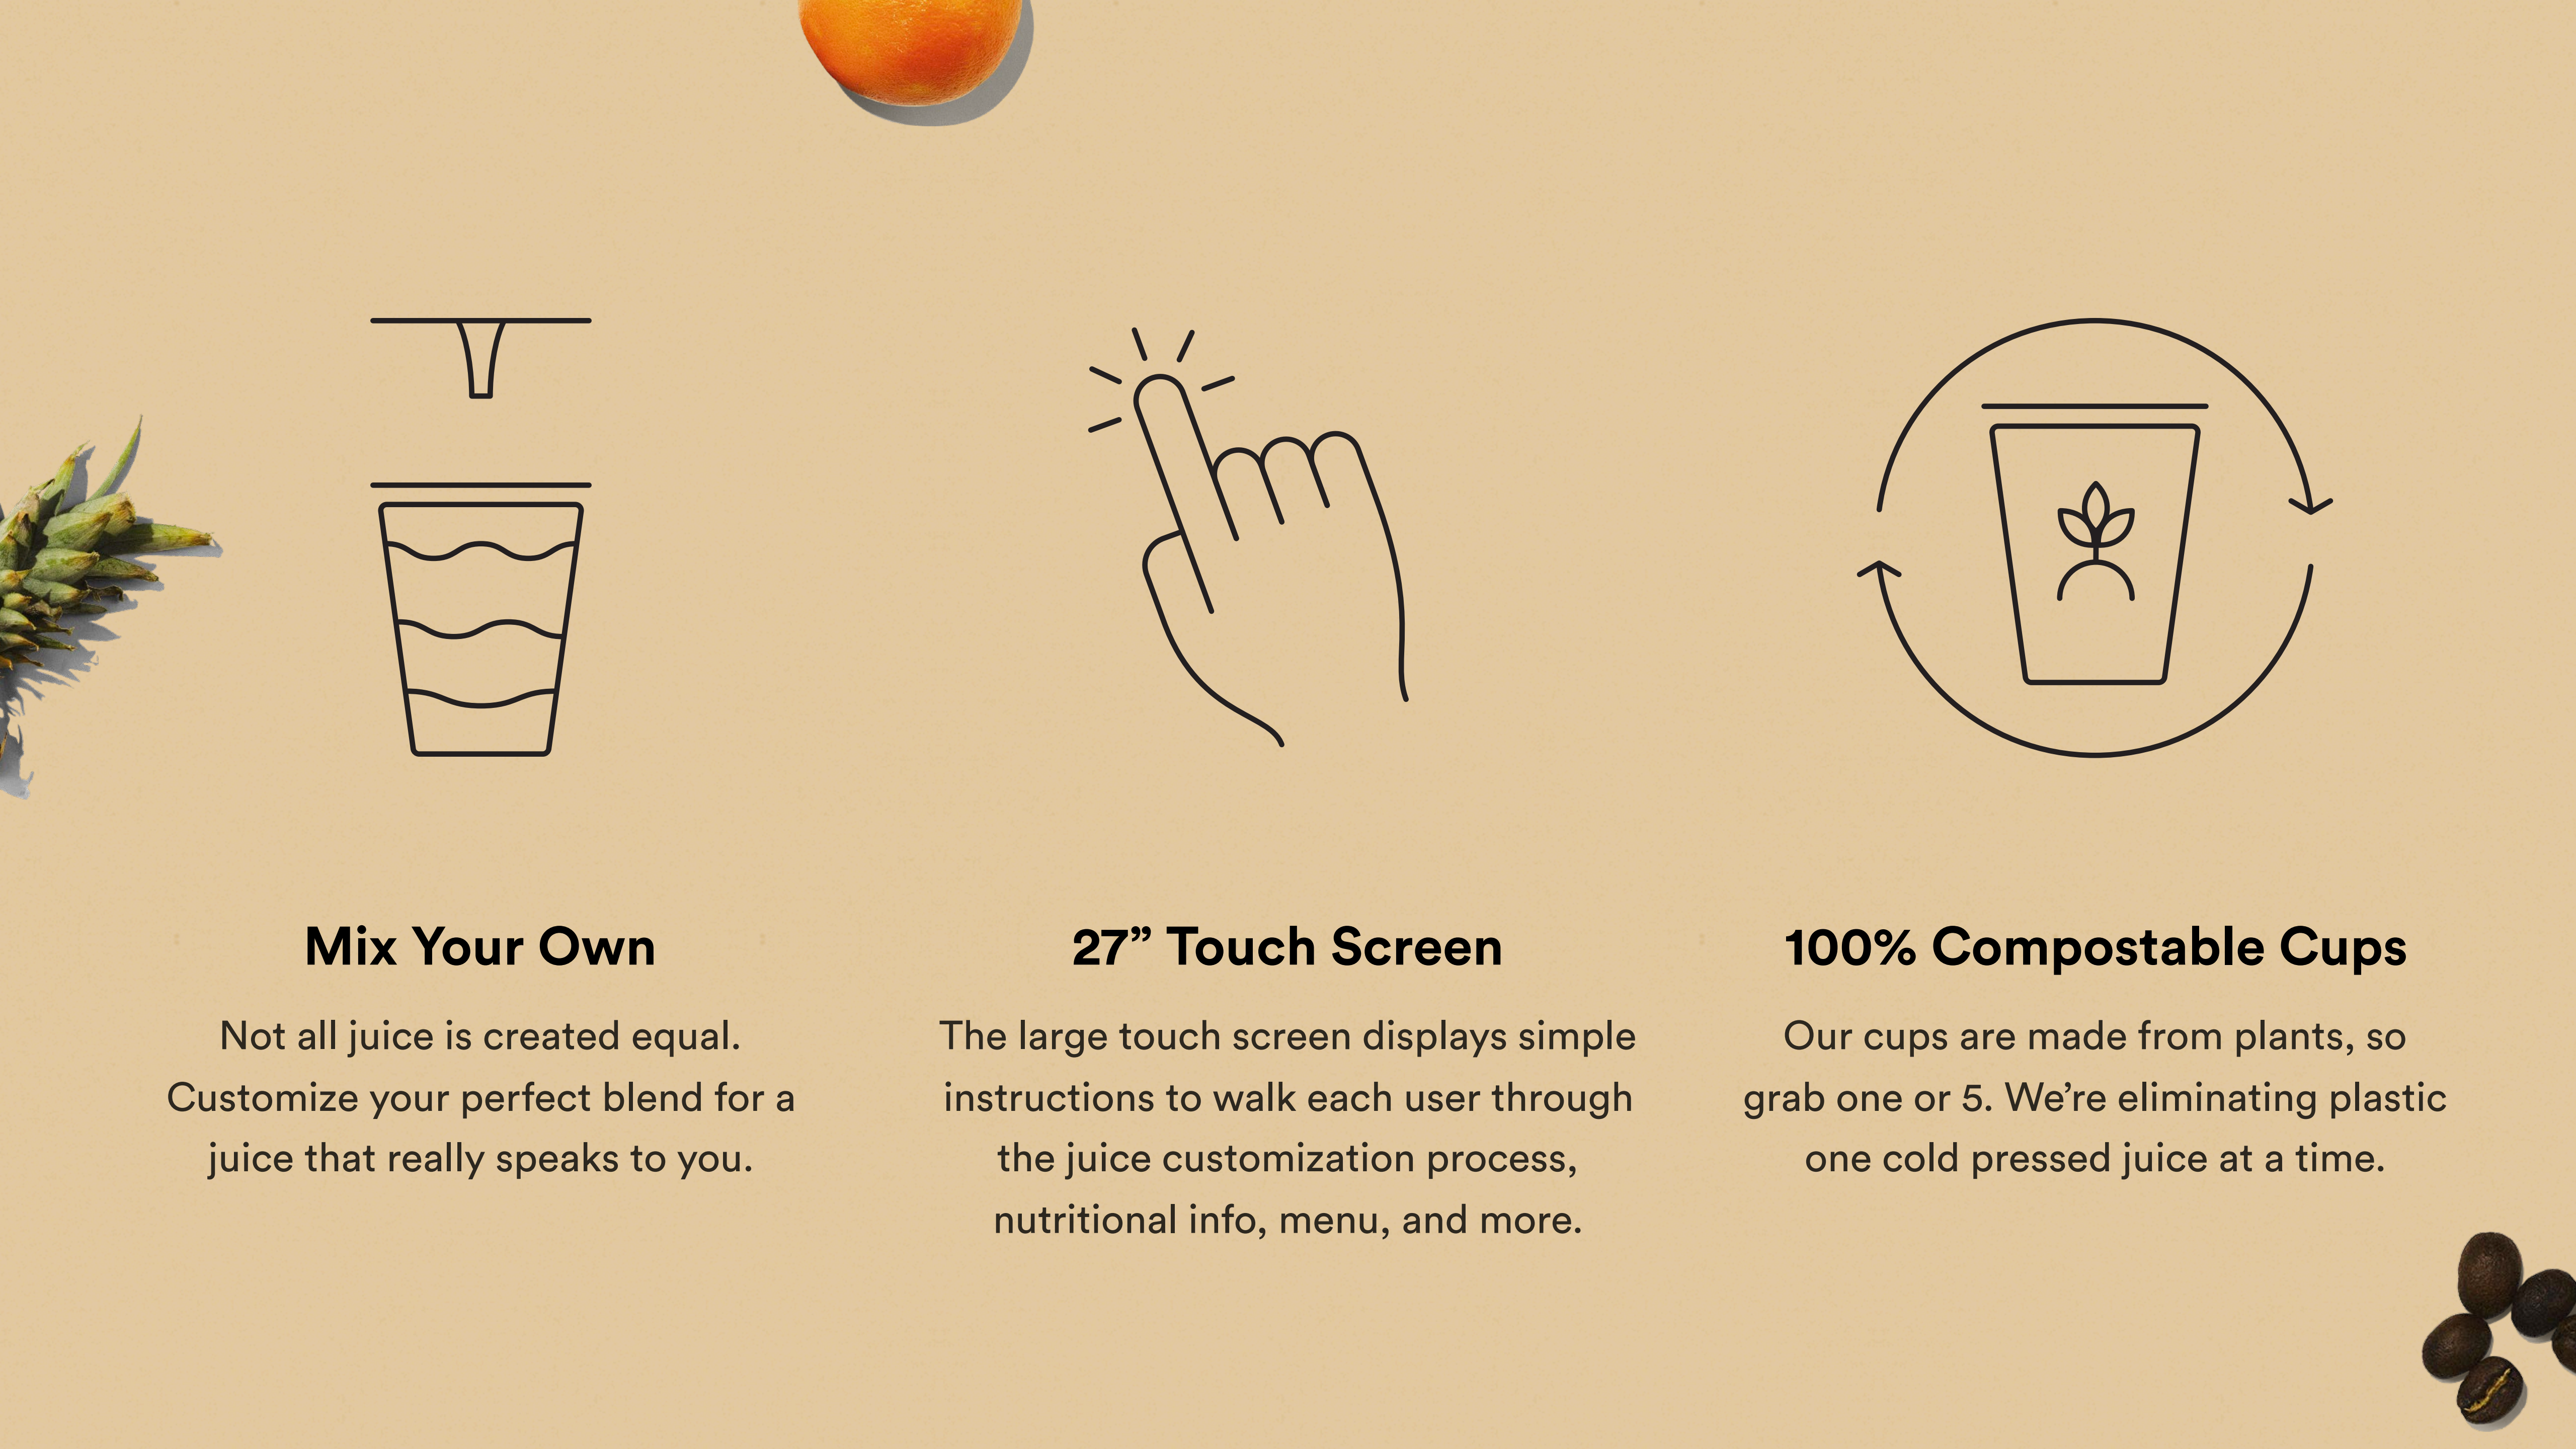

# Partners in Juice

Let's do it over juice. Our first-of-its-kind juice dispenser provides an easy way to bring organic, cold pressed juice to your community. At JuiceBot, we are excited to serve corporate café, universities, local gyms, apartment complexes and more!

## Mix Your Own

Not all juice is created equal.  
Customize your perfect blend for a  
juice that really speaks to you.

## 27" Touch Screen

The large touch screen displays simple  
instructions to walk each user through  
the juice customization process,  
nutritional info, menu, and more.

## 100% Compostable Cups

Our cups are made from plants, so  
grab one or 5. We're eliminating plastic  
one cold pressed juice at a time.

# Office Mode

Place JuiceBot in “Office Mode” to bypass payment. This feature can be used for everyday employee use or for special events at no charge to the user.

# Safety First

## Temp Control

Our kiosks are programmed with automatic shutoff in case JuiceBot ever goes over 41°F to keep all juice fresh.

## Rapid Pathogen Testing

We test every single batch of juice in order to keep everything you want in, and everything you don't want out.

## UV Disinfection

The dispensing compartment automatically enters self-cleaning mode after each smoothie or juice is dispensed.

## Seal of Approval

JuiceBot is approved under NAMA (FDA code) for fresh vegetable and fruit juice

# We've Got You Covered

We handle everything from delivery to pickup:

- JuiceBot Placement
- 24/7 Remote Control & Monitoring
- Servicing
- Cleaning
- Software Updates
