

Matador MP85 Hectorra 4x4

- Superb performance for 4x4's

► Benefits

Safety

- Protection against aquaplaning

Performance

- Excellent handling

Environment

- Quiet drive

► Description

The MP85 Hectorra is an ideal choice for today's high performance 4x4's. Designed for 100% on-road applications the for MP85 provides excellent protection against aquaplaning thanks to wide circumferential grooves and an open inside shoulder. The continuous circumferential ribs increase the tread stability giving excellent handling characteristics, whilst a computer aided design tread pattern ensures a quiet drive. Tyre wear indicators act as a visual stimulant to the consumer when their tyres need replacing.

► Features and Benefits

No	Image	Feature	Effect	Benefit
1		Wide circumferential grooves	Rapid water dispersion	High protection against aquaplaning
2		Continuous circumferential ribs	Increased tread stability	Excellent handling
3		Computer aided design tread pattern	Smooth contact patch transition onto road surface	Quiet drive
4		Tread wear indicator	Indicates need for tyre replacement based on the tread wear	Visual stimulant to the consumer that the tyre needs replacing
