

Matador MP46 Hectorra 2

- Top performance for UHP vehicles

► Benefits

Safety

- Shorter stopping distances

Performance

- Excellent handling

Environment

- Quiet drive

► Description

The MP46 Hectorra 2 is designed for sports and luxury vehicles with ultra high performance. The MP46 has excellent braking properties and reliable manoeuvrability on wet as well as dry surfaces, as well as its high resistance to aquaplaning. Wide circumferential grooves aid rapid water dispersion which gives high protection against aquaplaning. Closed tread blocks on both the inner and outer shoulders return excellent stability giving superb handling characteristics.

► Features and Benefits

No	Image	Feature	Effect	Benefit
1		Wide circumferential grooves	Rapid water dispersion	High protection against aquaplaning
2		Closed tread blocks on both inner and outer shoulders	Good cornering stability	Excellent handling
3		Stiff circumferential ribs	Increased tread stability	Excellent handling
4		Computer aided design tread pattern	Smooth contact patch transition onto road surface	Quiet drive
