ELSEVIER

Improve content discoverability by mapping to the clinician's workflow

The intuitive interface provides an intuitive experience enabling clinicians to discover information in a way that makes sense. It builds shortcuts into the process of finding a clinical answer by leveraging existing clinical workflows. Each page is presented with a coherent visual hierarchy based on importance, relevance and recurrence, embodied in an intuitive system of colors and icons improving content discoverability.

Deliver the right information from the start

The search interface supports clinicians by getting them the information they need in the moment they need it. The dynamic algorithm provides the most relevant and comprehensive content instantly, while the built-in shortcuts allow clinicians to quickly drill down to the precise piece of information required. The search process is optimized to deliver the right information in the right form.

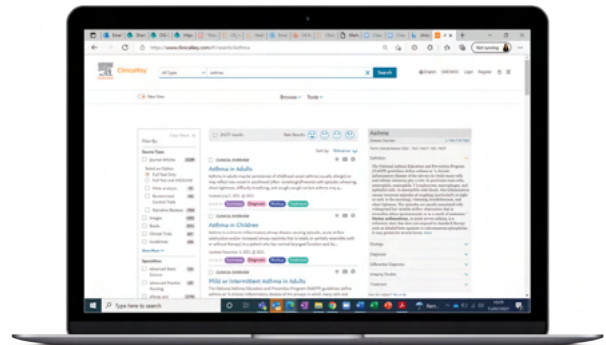

Support all clinical content needs in a single solution

With the explosion of information, we understand the need for quick answer however with multi-dimensional content, the clinician doesn't have to compromise their critical thinking skills to be quicker to answer.

By providing both quick summary information and underlying deep evidence in one solution, ClinicalKey supports the clinician in developing and maintaining critical thinking particularly in complex patient cases.

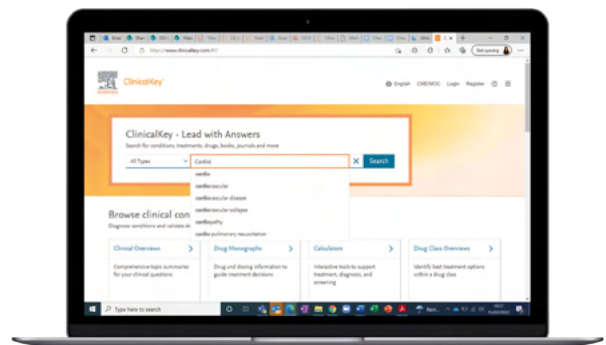

Path to Answers

ClinicalKey streamlines the path to answers to reduce clinicians' cognitive load, boost confidence and enhance patient outcomes

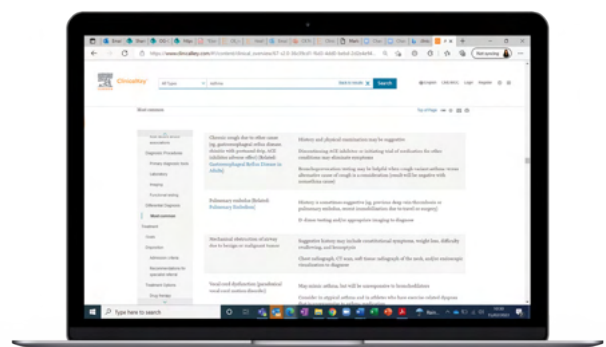

Smart Search

The search interface supports clinicians by getting them the information they need in the moment they need it.

Multidimensional content

Clinicians have easy access to both deep, referential content and quick, synoptic content in one platform
