Wevotex certifications - a step forward in CSR

Wevotex introduces

Laundry textiles for healthcare, hotels and industry with GOTS and O (B) CS certification.

Environmental effect

For growing 1 kg. cotton requires 8,000 liters of water, a lot of fertilizer and pesticide.

Global Organic Textile Standard (GOTS)

At least 70% (made with organic) to 95% (organic) of the processed cotton fibers must be organically grown, which means that no fertilizers and chemical pesticides may be used. In addition, the cotton must not be genetically modified.

Requirements are also imposed on the further processing steps for the environmental friendliness of the processes and working conditions.

Wevotex is certified for producing and supplying GOTS articles.

Organic (Blended) Content Standard (O (B)CS)

Between 5% and 100% of the processed cotton fibers must be organically grown. This percentage must be defined.

Wevotex is certified for producing and supplying O(B)CS articles.
